Weed-eating fish cleans lakes.

For 2,000 years, the Amur has been used to keep lakes and ponds clear of choking weeds and smothering algae. It's the only fish in the world which lives exclusively on weeds, grass and algae. Tested in America for over 12 years, the Amur has proven successful in golf course ponds, reservoirs and small lakes. And at far less cost than expensive repeated chemical applications. For details, call or write Bill Whiting, general manager, (501) 942-2515.
