

PRODUCTS

Poly Forms, a division of Presto Products, has introduced Sod-Saver, a landscaping block designed for turf maintenance. The blocks, made of heavy-duty molded plastic that is resistant to water, acid, heat, and extreme cold, are loadbearing and allow the growth of healthy

grassroots.

For use wherever heavy pedestrian and vehicle traffic is a problem, Sod-Saver blocks have the potential of providing new surfaces for golf course and park areas, for overflow parking, for service vehicle admittance for industrial and municipal buildings, and for airplane parking.

The blocks are available with solid cell centers for use in paving or as a temporary roadway. Blocks are 36" x 12" and are available 1-3/8" thick for normal use and 2-3/4" thick for heavy duty use.

"Sound Conditioned" M & M Brush Chippers

for...
less noise...
more efficiency

Applying engineering designs which "Sound Conditioned"™ our industrial scrap reduction machinery, Mitts & Merrill can modify our brush chippers for low noise levels. At the same time, those engineering features which have made Mitts & Merrill the leader for years have been retained.

*Copyright Mitts & Merrill, Inc., 1973, 1974, 1975. All rights reserved.

Staggered knife pattern, for years a Mitts & Merrill feature, has always resulted in a lower noise level. First, by segmenting the noise source. Second, through smoother cutting action. Third, by producing smaller chips.

Optional torque converters and the heaviest steel cylinder — even without an external flywheel — combine to give positive cutting action under the most rugged conditions. Isolates the engine from shock. Minimizes maintenance.

Plus • **Positive safety-lock pin** for greater operator safety • **Swing-away, folding feed chute** protects cutting chamber; allows instant access and increases maneuverability • **Heavy duty construction** includes coil spring, torsion-type suspension, and box tubular steel frame.

Westheffer Turf Division announces a new 300 gallon lawn and tree care spray unit. The unit is completely self-contained and is mounted on a heavy duty pipe skid for ease of loading and unloading. Standard equipment includes a 300 gallon stainless steel tank, electric start 7 h.p. gasoline engine, 10 g.p.m. pump, belt drive reel, and mechanical agitation system. Designed primarily for lawn care operators, the unit will also reach trees and shrubbery to heights of 25 feet.

Leisure & Specialty Cab Sales have introduced a Specialty Cab, manufactured with the roll bar concept, for the compact sized farm and garden tractors. The cabs are axle mounted and easy to align for quick

**DON'T
CUT OUT
QUALITY.**

**DO IT RIGHT,
WITH
STANLEY.**

Quality, by our standard, is something which goes a lot further than making tools. To Stanley, it means: a full line of tree trimmers for every job; the best warranty in the business; complete parts backup; and distributors to help you anywhere in the country. It's also the efficiency, safety and dependability of hydraulic power. We don't trim on anything so that you're able to do your trimming faster. Stanley Hydraulic Tools: 3810 S.E. Naef Road, Milwaukie, Oregon 97222. Phone (503) 659-5660. Telex 360771. Write or call.

Model DS-3 Spate 3" double acting diaphragm-type water pump from Desco Diesel Energy Systems handles sludge, sand, silt, slurries, viscous liquids and other problem fluids through delivery hoses with little internal wear.

Model DS-3 is compact, lightweight, easily portable and pumps air to 70 psi at approximately 8 cfm, pumps 1700 gallons/hour of water at 100 ft. head and 25 ft. suction, has 29 ft. maximum suction lift without need for a foot valve, and automatically reprimed in seconds. Its ability to pump through practically any length of suction and delivery hoses make the new Spate 3" pump a versatile, dependable unit for trench dewatering, industrial desludging, fire fighting, underwater pressure jetting and many other difficult applications. The quick-priming feature also allows it to operate efficiently in an automatic on and off mode for control of seepage.

Model DS-3's patented inertia flow principle enables the Spate Pump to displace two and a half times the actual swept volume of the cylinders at low internal speeds. This delivers high pressure while preventing excessive internal wear on the die cast aluminum/silicon alloy structure, which is also said to be highly resistant to corrosion from sea water.

The Nickerson Turfmaster 2001, British-designed and built, is a 3-wheel tractor with a 72-inch triple rotary cutter. Each of the three

wheels is powered by a high-torque hydraulic motor inside the hub, and the system also drives the cutting unit and implement lift system. The Turfmaster can turn completely within its own length.

The 2001's 4-cylinder, water-cooled engine provides power for climbing and traverse cutting 60° slopes. The mower can cut up to 30 acres a day on a single tank of gas. It also has a high transport speed between sites.

Acceleration and braking are controlled by a single foot-pedal while the steering, through a single column, is power-assisted and controls are arranged at the driver's fingertips.

No clutch, universal joints, or friction wheel brakes, together with design strengths should allow the Turfmaster to withstand prolonged use with low maintenance.

Life-Time Products offers a unique elevating platform trailer capable of hauling two tons of cargo over the highway. The platform hydraulically lowers completely to the ground or can be raised up to 40" to accommodate most truck and dock heights. The bed maintains a level plane when raised and lowered, avoiding load damage due to cargo shift. This all purpose trailer is designed for one-man loading and unloading of heavy items that would normally require costly lifting equipment or more man-power.

The trailer is furnished with standard equipment such as battery operated hydraulic pump, electric brakes, DOT lights and reflectors, safety chains and ball type hitch for over the highway use.
