# NEW ACECAP™ SYSTEMIC INSECTICIDE IMPLANTS

## THE EASY-TO-USE INSECTICIDE FOR HARD TO-GET-TO PESTS

ACECAPS are the modern way to control insect pests "in" ornamental trees. No need for expensive spray equipment; no danger of spray drift or runoff; and eliminates measuring and mixing of chemicals. Simply drill the tiny implant sites, insert the ACECAPS, and forget them. The insecticide will be translocated throughout the tree, killing targeted insects and providing continued protection. There is no need to return and remove applicators — the ACECAP Implants are left inside the tree where callous tissue will cover them in a short time.

ACECAPS contain ORTHENE® — a new generation insecticide which combines highly effective, broad spectrum insect control with a reduced hazard to humans, wildlife and the environment.

ACECAPS are registered for use in the control of some of the most destructive tree pests, including Gypsy Moth, Eastern Tent Caterpillar, Birch Leafminer, Pine Needleminer, Aphids, Elm Leaf Beetle, Mimosa Webworm, and others. The unique application of ACECAP makes it an acceptable alternative in an integrated pest management program.

ACECAPS Systemic Insecticide Implants offer the ultimate in an environmentally acceptable insect control program. Any pesticide can be harmful if misused; **READ AND CAREFULLY FOLLOW LABEL DIRECTIONS.**
