

# Turfgrass Entomology

The final part of the Turf Management Series would not have been possible without the generous assistance of Dr. Harry Niemczyk, Department of Entomology, Ohio Agricultural Research and Development Center, Wooster. The week after Dr. Niemczyk had co-directed a symposium on Turfgrass Entomology, he energetically helped collect the information needed for this section. The following week he flew off to a very important ichthyology mission in his favorite Michigan (in other words he went fishing).

Dr. Niemczyk, and the approximately 50 other contributors to this series, deserve recognition. They cared enough to take the time to help compile a varied stack of information which had never been organized before. They helped recognize the people who trained them. In doing so, they built a historical record of the turf industry.

If your promising employee asks about the turf industry, give him the last six issues of *Weeds Trees & Turf* to read. I'll bet he becomes even more promising.

Once again, if you'd like to add to the information and history presented in this series, please write me within the next month. All six parts will be combined into book form by the spring of 1981. The book should be as thorough as possible and you may be able to help. Contributors will be recognized in the book.

Dr. Harry Niemczyk
