

**Underneath it all...  
Weather-matic,  
the hidden secret  
of beautiful  
landscaping.**

**Our Spring-Loaded Plastic  
Pop-Up Sprinklers Offer The Most  
Cost Effective Performance Ratio  
Available Today!**

- Full 3½ inch nozzle pop-up
- Positive spring retraction
- Bayonet type twist-lock cover
- Under nozzle screen can be cleaned without removing cover
- Polyurethane combination seating and wiper seal prevents entry of sand and dirt
- Accurate, consistent, fully adjustable brass nozzles
- Low precipitation & lower flow rates allow more heads to operate per valve. Also cuts need for upgrading meter size.

For additional information on our 35P Sprinkler and 300 Series Nozzling, return the coupon below.

**Address for Standards**

On page 14 of the January 1981/Vol. 20, No. 1 issue, under *Equipment* is an article about a publication on chain saw safety. This is available from the American National Standards Institute, and the publication number (B175.1-1979) is listed.

Unfortunately, no address is given for American National Standards Institute, and I would like to order this publication. Would you please send me more information so that I may order this?

Sincerely,  
Grace Jacobson, Secretary  
Minnesota Department of Agriculture

*The address is: American National Standards Institute, Inc., Sales Dept., 1430 Broadway, New York, NY 10018. The institute has also just published its 1981 Catalog of American National Standards. This 206-page publication may be obtained at \$8.50 per copy.*

**Landscape book available**

I was pleased to note that you gave the serialization of Chapter 2 from "Landscape Design That Saves Energy" prominent placement (February WTT). However, I noticed one problem that I hope you may correct in a subsequent issue. Nowhere in the article or in your editorial is the name of the book mentioned. This may make it difficult for your readers who wish to buy the book, especially since there is a typographical error in the publisher's address as well (William Morrow and Co. is at 105 Madison Avenue).

Also, on page 21, line 37, there is another typo that conveys an incorrect fact. A windbreak of 20 foot (not two foot) Austrian pine cuts a 12 mph wind velocity to 3 mph.

Despite these slips, Marc Schiler and I are pleased with the product. I hope your readers are, as well.

Sincerely,  
Anne Simon Moffat

**OTTERBINE  
Spray Sculpture Floating  
Fountains. Now you can  
clean up ponds and lakes  
naturally.**

These self-contained water quality improvement systems help you keep unsightly algal growth and objectionable odors under control naturally, without costly chemicals.

And their sparkling spray displays may dramatically change the natural beauty of your ponds and lakes.
