## NEW REVENGE™

cost effective control of  
Johnsongrass, Bermuda, other grasses

- 1. Quick brownout.** Kills entire plant — roots and all — ends re-growth problems.
- 2. Economical, easy to use.** Free-flowing. Completely water soluble, forms a true solution.
- 3. Up to 98% control** of rhizome johnsongrass into the next season—even where foliar materials alone fail to give good control.

**REVENGE** is a highly effective, low-cost herbicide for control of established annual and perennial grasses. It combines contact action with systemic action that moves chemicals through foliage *and roots*. Short soil residual permits replanting within a few months.

**REVENGE** used at 15 pounds per 100 gallons of water, along with 2 quarts of Hopkins' Neptune® or Agicide® Activator, gives fast, effective control of troublesome perennial grasses such as quack-grass, bermudagrass, johnson-grass and cattails. Don't just get mad at grass problems — get **REVENGE**.
