Bunton adds Triplex Approach and Tee Mower

Bunton Company has added a new Triplex Approach and Tee Mower to its line of golf course maintenance equipment.

The maneuverable mower features heavy-duty, welded-steel construction and is ideally suited for golf courses, parks, municipalities and any other situation where a finely manicured turf is desired. The heavy-duty transaxle has three forward ground speeds and one reverse, and can achieve speeds of nearly 10 mph.

Each six-blade cutting reel is individually adjusted for a cutting height

range from 7/16 inch to 2 3/4-inch. The three reels are hydraulically raised and lowered and have front and rear rollers to eliminate scalping. They combine to give a 73-inch cutting width.

Standard features include a four cycle, 8 1/2 hp Robin engine, rear wheel steering with an automotive type steering wheel, and a choice of plastic or metal grasscatchers.

Manhattan II available for fall delivery

Manhattan II, developed through a hybridization and selection program by Dr. C. Reed Funk of Rutgers University and Dr. William A. Meyer of Turf-Seed, Inc., and Pure Seed Testing, Inc., will be available for fall, 1983 delivery.

This variety, 10 years in the making, offers advantages including attractive leaf appearance after mowing, greater density, darker green color, finer leaf texture, a more dwarf growth pattern, good shade adaptation, increased heat

and drought tolerance, and improved resistance to Rhizoctonia brown patch, stem rust, crown rust, leaf spot and red thread, according to its developers. Circle No. 181 on Reader Inquiry Card

Kubota begins marketing water pumps

Kubota Engine Division is expanding its product line to include six models of Kubota pumps. Having marketed their pumps in developing countries throughout the world for more than 15 years, Kubota is now offering them to the U.S. market through local distributors.

All models are gasoline-powered with Kubota-manufactured engines, featuring solid state ignition, cast iron cylinder liner, projection-type spark plug, ball bearings on the crankshaft, stellite valves and an extra quiet USDA muffler.

Four models, 1½, 2, 3 and 4-inch, are self-priming centrifugal. They feature 6,360 to 28,620 gallons per hour pumping output, 82' to 92' total head; 25 suction head; and self-priming time of 40 to 90 seconds.

Kubota's two self-priming centrifugal trash models are 2 and 3-inch with 9,540 to 19,080 gallons per hour pumping output; a 79' total head; 25' suction head; and a self-priming time of 20 to 25 seconds.

Nobrush controls weeds, grass

Nobrush from the Randustrial Corp., Cleveland, is a dry, granular product for weed control and wherever bare ground is desired. The degree of weed control and duration of effect will vary with the amount of chemical applied, soil type, rainfall and other conditions.

Usually, one application sterilizes the ground for one growing season. Nobrush is an effective control for annual and perennial weeds and grasses such as foxtail ryegrass, wild oats, crabgrass, cheatgrass, ragweed, goldenrod, plantain, dandelion, smooth brome, Canadian bluegrass and others. Nobrush may be sown by hand or with the Randustrial Weed Control Spreader.

Sun powers pond aerator

The Solar Powered Pond Aerator can replenish oxygen in ponds, fight algae growth and help to eliminate objectionable odors. The power source is a photovoltaic panel which converts

Great family fun at the most spectacular marine life parks in the world

sunlight directly into safe, usable D.C. electricity. There is no power cost and no expensive wiring involved; the unit is completely self contained.

The floating aerator is anchored in ponds with the panel facing out so when the sun strikes the panel, the spraying action begins. At sunset, the aerator shuts itself off. No switches are required. A special, submersible pump with a 400 gallon-per-hour flow rate recycles the pond water, cleaning ponds naturally. The device measures 4' x 4' and weighs 37 pounds and can be installed by one person. Low D.C. power eliminates the danger of electric shock. It is shipped partially assembled.
