Machine, incorporates a host of advancements in design that provide cleaner, faster, cutting and shaping of hedges, vines and ornamental plantings than ever before possible.

Powered by a new lightweight 1.2 hp, 2-cycle engine that produces 6500 rpm, the Model 2400 is able to effortlessly slice through branches of up to one-inch in diameter, and is outfitted with an all-position diaphragm carburetor with positive fuel/air mixture control that allows cutting at any angle.

Weighing only 12 pounds, the well-balanced Model 2400 can be maneuvered easily in virtually any cutting situation with the trimmer's wide handle spacing of 18.5 inches and fingertip throttle control. At the heart of the cutting assembly lie twin oscillating blades made of aircraft-quality steel for added durability and extended life. Measuring 30 inches in length, the blades are engaged by a twin-shoe centrifugal clutch between 3500 and 3900 rpm. A series can drive with a gear reduction of 3.93:1 pro-

vides a cutting speed of 34 cycles per second, which makes the 2400 probably one of the fastest hedge trimmers available. To insure operator safety, unit will only cut in one direction.

For easy maintenance and longevity, the Model 2400 is externally regreasable and is equipped with needle bearings on the blade drive and heavy-duty ball-type bearings at the main drive point.

The Green Machine Model 2400 Hedge Trimmer has a suggested retail price of \$299.50 and is sold exclusively through authorized Green Machine dealers.

Heavy-duty power from MD600 Mobile Drill

Hoffco, Inc., traditionally-known in the power equipment industry for its

Snowco Utility Trailers

... now even more versatile!

Model 20-002

Ideal for hauling grounds maintenance equipment, ditchers and other bulky, hard-to-handle items, the proven Snowco line includes eight flatbed trailers with loading ramps or tilt decks, plus a box bed trailer with tailgate.

The design of the popular ramp loading trailers—with perforated steel decks—has been improved for increased versatility. Three models are offered with capacities of 1,150 to 4,200 pounds.

Five tilt trailers with perforated steel decks are offered with capacities of 1,000 to 3,500 pounds.

The steel box bed trailer—capacity 1,200 pounds, is available with an optional canvas or fiberglass cover.

Circle No. 166 on Reader Inquiry Card

design expertise, has created a highly expandable piece of equipment, the MD600 Mobile Drill unit. It has heavy duty looks and heavy duty power, yet it moves easily over any terrain on 15 inch wheels.

An extended tubular handle with grip give control for mowing or operation. The MD600 mobile unit is a one-man operation, designed to do the work of a two-man drill.

You won't need to disassemble for transporting in a van or pickup. It's especially constructed to give ease and efficiency in disassembling and changing augers and bits. A locking mechanism holds the unit securely in place for changing augers and bits.

Hoffco's MD600 Mobile Drill unit is a natural for fertilizing trees. The two-inch or four-inch Hoffco augers are the perfect size to drill small holes needed for the fertilization process.

The manufacturer recommends its two-inch and 10 inch standard augers for digging in ordinary soil conditions. For soil such as caliche, hardpan or sandstone, the six-inch to 10-inch heavy duty auger is recommended, along with Hoffco's fast cutting Pengo bits. Another "plus" feature is a new Hoffco invention — a shock absorbing unit to relieve mechanical stress as it absorbs jolts and/or cushions damaging shock loads.

Walk, ride rotaries expand Jacobsen line

A new series of rotary mowers that operators can walk behind or ride expands the turf care line of Jacobsen Division of Textron Inc.

Named the Commercial 32, 36 or

50, for inches of swath cut, the new line is aimed at turf situations where neither smaller walk-behind nor mid-size riding rotary mowers lend themselves. The rotaries are ideal for landscape contractors, lawn care services, cemeteries, schoolyards, condos and industrial parks, roadways and similar turf areas that require a combination of high maneuverability and straight line production work.

One key design criterion in developing the new Commercial line was flexibility in customer choice.

Not only is a range of cutting widths available, but the machine can also be ordered with 8, 11, 12 or 16 hp gas engines.

Height of cut adjusts from one inch to four inches in 1/2-inch increments by raising the reinforced heavy gauge deck, which includes a guard for trimming around trees.

In addition to a choice of engines, cutting widths and a trailing sulky, a grass catcher is also available to give a more formal look to landscaped areas. Circle No. 191 on Reader Inquiry Card
