

# BIG

With the "Big Little Rotor" (17017), Buckner brings the best value in the business. It operates at full or part circle with easily set arc stops. It also has an anti-backsplash arm and a 23° trajectory angle to combat the wind. And these are just a few of the reasons it performs so well. An impact resistant plastic housing and lid and brass bearing journal make this little rotor tough enough to keep on performing for years.

Side and bottom inlets reduce installation costs. Maintenance is easy because all internal parts are removable from above ground *without any special tools*. And, a heavy retraction spring makes sure the sprinkler stays down when not in use.

For more information on the "Big Little Rotor" and other fine Buckner residential/light industrial products, contact your local Buckner distributor today!

*bringing the best*
