Perennial ryegrass gets PVP certificate

Pickseed West recently announced that the USDA Plant Variety Protection Office has issued a PVP certificate for Fiesta II perennial ryegrass. The application was processed and protection granted for Fiesta II in record time.

According to Pickseed's Jerry Pepin, Ph.D., Fiesta II represents the latest and best efforts in variety development to date. It is a dark green col-

ored, fine-leaved variety that has a lower and slower growth habit than most perennial ryegrasses and is less stemmy in the spring.

It has excellent heat tolerance and summer performance.

'Bandage'-type wrap protects young trees

Guard-Tex Tree-Wrap provides excellent protection for newly-planted trees

and bushes from the elements, dogs, rabbits, mice and other gnawing animals, according to its manufacturer.

Easy to apply, self-adhesive Tree-Wrap protects tender bark against splitting, sun scald and freezing temperatures while allowing the bark to breathe, General Bandages says. Tree-Wrap is also easy to remove, and because it sticks only to itself, it will not strip tender bark or leave a gummy residue.

Landscape managers and nurserymen can also use Tree-Wrap for grafting operations, staking tomatoes and training vining vegetables, roses, espaliered trees and shrubs.

The Ultimate, All-In-One Landscape Implement!

The unique, new Dakota Hand is designed to be a do-anything, go-anywhere landscape tool.

\$3200
TOWABLE TRANSPLANTER

\$1900
BUCKET or 3-POINT MOUNT TRANSPLANTER

\$2800
SPRAYER

The main parts are a towable, bucket or 3-point mount tree transplanter, a boom sprayer, a log splitter, a dump box, post hole digger, and a spreader. The transplanter's patented floating cradle enables you to hydraulically vary the root-ball diameter up to 28 inches.

Options include water pumps, hydraulic pumps, jack hammers, hydraulic power packs, and much more.

The Dakota Hand is made specifically for resorts, golf courses, apartment complexes, hobby farms, parks, nurseries, municipal and state facilities, and for rentals, landscapers or soil conservation.

Pesticide add-in eliminates odors

One pint of Mask-It in 1,000 gallons of spray mix converts a pesticide odor into a pleasant fragrance.

An unpleasant odor is translated in the public's mind to be toxic vapors of hazardous chemicals, Rockland Chemical Co. claims. No longer do the majority of lawn care clients believe that the pesticide's efficacy is proportionate to its odor, says Rockland. They are more concerned about possible health hazards and neighborhood annoyance, the company adds.

Mask-It helps solve all of these consumer concerns by eliminating the unpleasant odor associated with pesticide applications.

Granular herbicide now labelled for ornamentals

A new long-lasting granular weed

Circle No. 138 on Reader Inquiry Card

control product containing Surflan is now available for ornamentals.

XL, from Elanco Products, is registered for use on container-grown ornamentals, landscape ornamentals and ground covers.

XL is widely used as a pre-emergence herbicide in warm-season turf for control of most annual grasses and certain broadleaf weeds. When used on ornamentals, XL controls a broad spectrum of weeds for up to eight months, depending on rate.

XL is surface-applied over established plantings, requiring only rainfall or irrigation to move the herbicide into the soil. One- to two-inch cultivation will not reduce its effectiveness.

Computer provides tree management help

A group of information-related services, including computer training, is being offered by ACRT, Inc.

The "Tree Manager" package includes tree inventory, a management plan, computer software and software installation, training and support. This management information system ensures the most dangerous tree situations are attended to first. Then, all trees are placed on a routine schedule which can be budgeted on a yearly basis.

Tree Manager software generates listings of sites and trees that meet a user-specified condition, listings of inspections to be completed, work orders and summary reports.

Fine particle fertilizer has pre-emergence action

O.M. Scott & Sons now has an all-soluble, fertilizer-based pendimethalin product 20-5-5 Fertilizer Plus Pre-Emergent Weed Control at a low price.

While maintaining good spreadability, this new formulation contains about four times more parti-

cles per square inch than typical blends to greatly enhance coverage and pre-emergence control performance, the company says.

Applied within the flexible rate range stated on the label, the new Scotts product delivers 1.5 lbs. of pendimethalin per acre at 0.8 lbs. of nitrogen per 1,000 sq. ft. This allows users to apply higher rates of active ingredient in areas of heavy weed pressure, without applying too much nitrogen at the same time.

Hahn has an Aerifier[®] to fit your Tractor... and your Budget.

For fast, easy and economical aerification... and they're practically maintenance free.

TM-140

Aerifies a 6 ft. swath using your tractor's 3-point hitch. Holds 140 "open" or "closed" style tines. Half-ton weight rack is standard.

TB-140

The 6 ft. tow-type has same features as TM-140, plus hydraulically operated transport wheels. Can use your tractor's hydraulics or optional hydraulic hand pump.

TM-60

Only 34 inches wide and they aerify a full 32 inch swath with 60 "open" or "closed" tines.

The TM-60 attaches to the 3-point hitch of a category "0" or "1" tractor. The TB-60 tow-type unit can be used with any tractor equipped with hydraulics. A hydraulic hand pump is available to provide self-contained powered lift.
