Lawn mower starter for restoring power

Specially formulated for 2- and 4-cycle engines, Blaster Lawn Mower Starter & Tune-Up restores power and compression without using dangerous ethers. The new starter/tune-up removes carbon, gum and varnish deposits from the engine as soon as added.

Blaster instantly cleans the engine to allow it to run smoother. It frees

rings and valves, removes moisture and prevents vapor lock. The product is ideal for snowblowers, tractors, chain saws, snowmobiles, outboard engines and engine layovers.

Fungicide available in new liquid form

A new liquid form of Rubigan is available from Elanco. Rubigan AS controls dollar spot on tees, greens and fairways for up to 28 days, and is labeled for all patch diseases. A tank mix of Rubigan and Daconil

2787 also controls large brown patch.

Rubigan AS has local systemic action on both warm- and cool-season grasses and remains effective after drying on foliage in the event of rain or irrigation. Less than 2 oz. of Rubigan AS per 1000 sq.ft. will control dollar spot from 14 to 28 days.

Hydraulic systems drive triplex, 5-, 7-gang mowers

Ransomes' new triplex GT greens mower has a cutting width of 66 inches. It is offered with nine knife greens cutting units and a choice of optional units for tees mowing, verticutting and vibra-spiking.

The mower is entirely hydraulic, with hydrostatic drive and hydraulically-operated cutting units. Reverse drive provides backlapping units.

A single pedal raises or lowers the cutting height hydraulically with an electronic control. A digital readout gives cuts per meter.

The model 340TG is a five-gang mower and the 465TG is a seven-gang mower.

The trailers are self-contained and quick hitch models with a built-in hydraulic system to drive cutting reels and raise and lower cutting units.

Electric controls are in the cab. The mowers are equipped with either fixed or floating heads. The 340TG cuts an 11-foot-plus path, the 465TG a 15-foot-plus path.

Light fairway mower uses five reel gangs

A new lightweight fairway mower was introduced earlier this year by Jacobsen. The LF-100 is a durable, out-front five-gang reel mower that gives a greens-quality cut on fairways. It cuts a 100-inch swath at speeds up to 5 mph for higher productivity.

A new mower configuration puts the two outside reels in front of the operator, so the trimming edge is easily seen without looking back and away from the mowing path. It also provides a shorter uncut circle of grass on turns, and makes grass catcher removal and reel maintenance much easier.

The LF-100 has a 22 hp, three-cyl-

inder diesel engine.

Riding aerator features 'on-the-go' adjustment

A new Riding Aerator, the Ryan GA-30, features variable core spacing from 2½x1 inches to 2½x5 inches or anywhere in between, and the operator can vary the spacing with a hand lever while aerating.

The throttle, choke and ignition switch are also hand-operated while speed, brakes and lift control for the aerating head are controlled by foot pedals. The machine has hydrostatic drive, and transport speed is 6 mph, nearly double that of other aerators.

Transplanter allows varying rootball sizes

The Dakota Hand from Mid Dakota is a towable transplanter for bucket mount on three-point hitches. The main frame and spade system allows the operator to vary the size of the rootball up to a 28-inch diameter.

Also adaptable to the mainframe are a log-splitter, hydraulic dump wagon and sprayer which are all interchangeable.
