

Sandoz pops Nader for wrongful report

DES PLAINES, Ill. — John A. Licata, director of environmental, health, safety and quality assurance for Sandoz Crop Protection Corp., took no time to fire off a poignant response to a recent anti-pesticide report.

The highly-publicized report was issued by Ralph Nader's Public Citizen's Congress Watch on the lawn care industry. Licata's letter to the author of the report points out inaccuracies in the group's criticism of the herbicide Banvel and, along the way, gives us a good model to follow when undue criticism rears its ugly head.

Licata writes that Banvel is not restricted in California and that "there is no substantiation that dicamba, the active ingredient in Banvel, is

associated with an increased chance of miscarriage." He points out that fetotoxicity was slightly increased in rabbit studies—which is not unusual—and that the study's author considered it insignificant when making the report.

Also, concerning remarks that the product is a threat to groundwater, Licata says that "...because of its rapid degradation and the soil absorption of the degradation products, dicamba is not normally detected in surface or groundwater. It has not been detected at levels above the EPA's health advisory level."

Besides Banvel, Sandoz also produces Bonzi growth regulator, Mavrik Aquaflo and Pentac for the lawn and landscape markets. □

A.A.N. director of government relations Ben Bolusky (at podium) offers the association's support of "oasis legislation" in Washington, D.C. At right is Indiana Congressman Jim Jontz, who introduced the act.

Nurserymen like oasis ideas

WASHINGTON, D.C. — The American Association of Nurserymen (AAN) has come out in favor of the Urban and Community Forestry Act of 1989.

The bill has become

known as "oasis legislation" because it supports the practice of tree planting to help cool urban areas.
