The National Arbor Day Foundation Urges You to Plant Trees to Fight the Greenhouse Effect

The Earth is heating up. "The Greenhouse Effect," says James E. Hansen, Director of NASA's Institute for Space Studies, "is here... it's time to stop waffling."

A sharp increase in atmospheric carbon dioxide (CO₂) is a major cause. Two things contribute — the burning of fossil fuels and the destruction of forests.

You can make a difference. Trees you plant may be our best line of defense. Trees can shade your home in summer, and slow winter wind. While your trees absorb CO₂, they also reduce the amount of fossil fuel burned for cooling and heating.

As a result, your trees can be as effective as 15 forest trees in fighting the Greenhouse Effect.

Free Booklet. The National Arbor Day Foundation has published a guidebook titled *Conservation Trees* which will show you how to plant and prune shade trees and windbreaks.

I'm pleased to offer it to you free of

charge. Just return the coupon below and I'll send your *Conservation Trees* booklet by return mail.

WHAT HAPPENS TO YOUR REPUTATION WHEN YOU SPECIFY MULCH?

Specifying bark or mulch as a ground cover might seem like a bright idea at first. But soon as the cover starts to decay and deteriorate, the brilliance of your original design begins to fade. That's why you should insist on FloweRock®, a natural volcanic stone that retains moisture, insulates the soil and enhances weed control while fully maintaining its beautiful earth tones. Find out how FloweRock can help your reputation for quality endure. Contact your nearest distributor, or call Colorado Aggregate at 1-800-528-2765 or 1-719-589-4925 (in Colorado).
