

# AQUAGRO COST BENEFIT CHART

## AQUAGRO PROGRAM

Note: M = 1000 Sq. Ft.

	AquaGro•S OPTIMUM 3.5 lbs/M monthly on greens	AquaGro•L OPTIMUM 8 oz/M monthly on greens	AquaGro Injectable 2-6 qts/Acre as needed thru irrigation	AquaGro•L CURATIVE 2-8 oz/M as needed on problems	AquaGro•S CURATIVE 3.5 lbs/M as needed on problems	AquaGro Advantage 1 pellet/Acre as needed during hand watering
<b>BENEFITS</b>						
Touch Up Localized Dry Spots	✓	✓	✓	✓	✓	✓
Control Localized Dry Spots	✓	✓		✓	✓	
Prevent Localized Dry Spots	✓	✓	✓			
Control Wet Areas	✓	✓		✓	✓	
Improve Pesticide Activity	✓	✓		✓		
Improve Water Use Efficiency	✓	✓	✓			✓
Reduce Disease Incidence	✓	✓				
Improve Rooting of Turfgrass	✓	✓				
Reduce Irrigation Requirements	✓	✓				
<b>Cost of Each Program</b>	\$4.45/M or \$26.60/M/Yr	\$1.60/M or \$11.00/M/Yr	\$0.60/M or \$24.50/Acre	\$0.20/M to \$1.60/M	\$4.45/M	\$7.00/pellet or \$0.25/M

## AQUAGRO ADVANTAGE PELLET

Aquatrols has created the Advantage Pellet, a solid formulation of AquaGro soil wetting agent. The pellet, applied through a special hose-end unit, allows turfgrass managers to spot-treat localized dry spots, syringe and perform touch-ups on the golf course as a supplement to their regular AquaGro program. The AquaGro Advantage System—consisting of the Pellet and Applicator—makes applying AquaGro convenient and safe for turf under any weather conditions.

## NEW AQUAGRO FORMULATIONS ADD CONVENIENCE AND FLEXIBILITY

Turf managers will be getting about twice the active ingredient of competitive pellets and at a lower cost per pellet. The Advantage Pellet can be used in competitive wetting agent applicators. Each pellet treats as much as an acre.

The Advantage Applicator features a hose quick-couple and comes complete with fittings for one-inch hose and an adaptor for a 3/4-inch hose.

## AQUAGRO INJECTABLE

Aquatrols is introducing a new soil wetting agent formulation, AquaGro Injectable, created spe-

cifically for injecting into golf and landscape irrigation systems, according to company president Robert Moore.

Injectable is a low-viscosity formulation containing 33 percent AquaGro soil wetting agent. The new formulation can be injected into irrigation systems using any commercially available irrigation injection pump. AquaGro Injectable permits the user to easily adjust rates and application frequency for performance and economy.

"Many golf courses and athletic facilities across the country are already injecting AquaGro•L and other wetting agents to improve water use efficiency and save labor," says Moore.

"Increasingly, golf course superintendents are telling us that injecting soil wetting agents is an ideal method of applying them to get the benefits all over the course, especially fairways." Like the other AquaGro formulations, AquaGro Injectable will reduce water run-off and evaporation and enhance the performance of water-soluble chemicals.

Aquatrols also offers two injection pumping systems, the P.P.M. Unit, a fixed-pulse pump and The Little Squirt, which automatically adjusts AquaGro injection rates to compensate for variable irrigation flow. Both systems require no special skills or tools to install.
