

# LANDSCAPE MANAGEMENT

On the cover: Unmanaged water lettuce growth chokes a Florida stream.

## 22 COVER STORY: MANAGING AQUATIC WEEDS

by Joe Hinkle. A challenge of the '90s will be to achieve a realistic balance between habitat requirements and the public's concern for recreational access and lake aesthetics.

**30 REVIVE YOUR POND WITH AERATION**  
Summer's heat can turn a pond into a smelly, slimy well. Aeration equipment can revive it and provide an interesting landscape element in the process.

**36 WHEN THE RUBBER MEETS THE ROAD**  
by Phil Christian III. Managing travel time is a never-ending problem for landscape managers. When does the clock start? How does travel time affect the total costs of the activity, the production, and people who are traveling?

**40 AERATION WORKS!**  
by Terry McIver. If turf could talk, you'd hear all about the benefits of soil aeration. It's a service worth selling.

**46 THE BAYOU: CLEARING ITS WATER**  
With more than 6.4 million acres of freshwater habitat and a sub-tropical environment that favors rapid aquatic weed growth, Louisiana is hard-pressed to keep water hyacinth from completely choking many waterways.

**50 FUTUREVISION**  
by Jerry Roche. The 1990s will bring more judicious use of chemicals, a more aesthetic landscape and closer involvement between management and labor, according to a respected panel of green industry executives.

**52 WORKING OVERTIME ON MORALE**  
by Ed Wandtke. By eliminating 'de-motivators,' you can improve employee morale and production during the long weeks of spring and summer.
