Treatment system cuts nitrates by 80 percent

An 80 percent reduction in contaminating nitrates was achieved at a Pennsylvania school system, after installing an alternative wastewater treatment system manufactured by Cromaglass Corp. of Williamsport, Pa.

Three studies, one conducted by Dr. Melvin C. Zimmerman of Lycoming College at a 250-student school that generates 1400-2200 gallons of wastewater per day, proved the Cromaglass system's efficiency.

The treatment system is also in use at the Jack Nicklaus-designed Grand Cayman Island golf course, and various island banks, condominiums and office buildings.

According to Cromaglass, the collated

data has demonstrated the batch treat unit capable of excellent total nitrogen removal superior to that required under new federal and state agency regulations.

New hydrostatic ZTR cuts a 42-inch path, maneuvers

Dixon Industries now offers the green industry a 42-inch hydrostatic ZTR mower.

The new ZXTR 542 features Hydro Gear drive, and, according to Dixon, outmaneuvers any heavy duty mower on the market.

The mowers move in tight circles around trees or light poles, cut neat, square corners without leaving uncut patches, turn in place without interrupt-

ing the pace. On lawns with numerous trees, benches and other obstacles, those saved minutes become hours.

It is powered by a Kohler engine.

New mulching blade has eight cutting edges

The new 2x2 Split Level mulching blade from Snapper features four horizontal and two vertical cutting edges that keep chopping clippings until they are reduced to a fine, powderlike mulch.

The new technology is available on the company's 1992 series of Recycling Mulcher Walk Mowers, with engines 4 hp and larger. Snapper also offers its standard recycling mulcher kits for all other Snapper mowing products, and says the Split Level blade will soon be added to expanded to include most Snapper product lines.
