and employees from possible spills or accidents.

Holler wanted recycling equipment, wash down area and mix-and-load to be adjacent to each other on the impervious pad for easy, efficient operations.

Plan for safety—Environmental issues do not go away. Here are our recommendations to golf course designers, contractors and superintendents:

• Develop a plan to strategically incorporate environmentally sensitive areas such as wildlife preserves, indigenous tree hammocks and wetlands.

• Conserve water; use an effluent water source for irrigation and a recycling system for maintenance washing.

 Follow through with responsible construction activities to minimize damage to protected plants and animals.

• Set up environmentally sound management practices for course maintenance.

Consider implementing the new EPA

storm water run-off plan.

If a course is properly designed and managed, the potential hazards to the environment can be reduced.

It pays to play it safe. Like doctors practice defensive medicine, golf courses should practice defensive environmental programs. The alternatives can lead to regulatory fines, decreased property values, expensive clean-up, adverse media attention, and law suits.

Ballantrae Golf and Yacht Club is just one of the many courses coming to the forefront of being a premier, "environmentally in-synch course," and with all of the recent media and television coverage, it will not be long before most or all golf courses in the U.S. adhere as well.

Winter golf: Turf's last gasp before snow falls

Dormant bentgrass is helpless against heavy traffic. Keep an eye on temperature swings, apply extra topdressing, and pray for snow.

• A recent study showed golf to be one of the favorite winter sports in the eastern and midwestern U.S...

(Just kidding.)

But winter golf is one thing some courses put up with due to member demand or as a way to bring in some extra revenue. Most fans of outdoor sports are content to wait until spring. But not golfers.

"You get a nice day, you want to go hit the ball around," says Joe Alonzi, superintendent at Westchester Country Club, Rye, N.Y.

Westchester has multiple courses, so Alonzi can keep one 18 closed; but on the other links, he's faced with the challenge of protecting the greens from serious damage. One challenge of winter golf, says Alonzi, is being able to guess what the weather will do on any given day. In the early days of winter, the temperature will fluctuate from a morning freeze to an afternoon thaw.

To help prepare for winter golf, Alonzi applies an extra layer of topdressing just before winter, or sometime during.

"Spring maintenance is more affected," says Alonzi. "The greens might need an

extra aeration, fertilization or pesticide spraying, as a result.

"There isn't much you can do in the winter to maintain the course," he says, "beyond keeping it closed on the bad days."

Poa problem—Winter golf has been a tradition at Terrace Park Country Club for many years, says Rick Grote, because the members at this Milford, Ohio course "love their golf."

The temperature can be as low as 35, says Grote, and he'll see about 30 members on the course.

Grote says the extended play causes a serious *Poa annua* problem in greens.

"The bent can't recuperate when it's dormant," says Grote. "The poa wakes up

first and has a good foothold by the time the bent starts to grow."

Grote's looking for a solution.

"As of December 20th, we will keep one green closed and use a temporary one in its place." to

Grote: Experiments to stop *Poa annua*.

see how the unused green fares during the winter.

As a possible cure for the poa problem, in August Grote's crews applied a mixture of Anderson's fertilizer and Dimension herbicide to one-half of three greens. They'll repeat the treatment in February.

To help the greens cope with foot traffic, Grote has the cups rotated once a week if the turf's not frozen.

"In winter, (the course is) compared to the public courses. In the summer, we're compared to the other private clubs," Grote says, which sounds like a testament to his skill as a greenskeeper.

But he thinks it's because somebody up there likes him.
