

PRODUCT REVIEW

sion level.

Standard equipment features of the 3200 include an electronic control unit to simplify operation.

The company has redesigned the floating cutting system and improved the steering system to prevent sliding on tight turns. The carrier frame roller has been eliminated, however the basket is fully independent of the cutting unit. Cutting swath of the 3200 is 59 inches.

Get winter turf protection with tested geotextiles

Winter Green is a non-woven, needle-punched polyester geotextile to protect sensitive turfgrasses, which do not enter dormancy, from winter stress.

Developed by Contech, and tested by turf professors at Texas A&M University, Winter Green can be used in sports turf and horticultural applications.

Aerator rotors stay with rough terrain

The new model AE-80 Aera-vator, from First Products, Inc., is mounted on a 3 pt. hitch, on tractors 35 hp or larger.

The PTO power vibrates the tines to penetrate and fracture hard, compacted soil.

The Aera-vator covers an 80-inch wide path. A vertical pivot joint on the hitch unlocks when the unit is lowered, which allows the unit to make sharp turns during operation.

The unit centers on the tractor and locks when lifted. A horizontal pivot point keeps the rotors in contact with the soil over rough ground.

Injector tool adjusts to reach one foot deep

The new RZI-4903 root zone injector, from Rogers Innovative, Inc. injects pesticides or performs a fast, light aeration at the rate of 64,800 sq. ft./hr., in a 3 x 3-foot grid.

A deeper, more thorough aeration can be achieved at a rate of 28,800 sq. ft./hr.

The 4903 will inject most any nonabrasive, pumpable liquid, from one-half to one-foot deep.

Superintendents can aerate greens quickly and efficiently, thanks to a high transport speed.
