

Spring snows hit Northeast, floods drown Midwest

by TERRY MCIVER / Editor-in-chief

The temperature in Cleveland peaked at 74 degrees on Sunday, April 6. In North Dakota on that same day, snow drifts reached as high as 20 feet.

On April 18, North Dakota's Red River had crested at 54 feet, and Grand Forks residents didn't know when, or if, they'd ever make it back inside their homes.

Weather was the lead story in the minds of many green industry professionals in the east, northeast and midwest, as un-spring-like conditions prevailed.

Scott Buitta of American Lawn Care, Norwell, Mass., said the two feet of snow didn't interfere with his scheduling, because he expected it to happen.

"Some of the commercial companies had already been out there applying product," says Buitta. "It kind of shows you their timing. They've been out there a month. I was expecting something to happen. Last year we had eight inches the same week."

The plows go back on

"We were all set for spring," said Michael Byrne of Byrne Brothers Landscaping, Inc., Essex, Mass. "We had taken off all the plow stakes on properties, and were scheduled to go to work on April 2."

Instead, the plows went back on, and Byrne's com-

pany had to handle a 32-inch snowfall.

"We had about 40 guys out shoveling," said Byrne, who teamed with one or two other companies to meet each others snow removal equipment needs, which was better than the municipal crews were able to do.

City crews in Boston were sharply criticized by residents for inept snow removal. The National Guard was called in to help remove fallen trees and utility poles, and residents were shoveling the streets to get to their cars.

"We thought we had enough plows," said Boston Mayor Thomas Menino.

Turf disease pressure?

As far as disease pressure on New England turf, Gail Schumann, plant pathologist at the University of Massachusetts, says disease will likely be minimal since the turf was briefly covered.

"I've had a couple samples come in where the frost seems to be affecting some of the *poa annua*, but it isn't killing the plant, because the crowns are alive. It will probably come back when we get a stretch of warm weather. But with the weather, none of us should be doing any predicting," says Schumann.

"Many in the Northeast are telling me that the bent-

grass came through winter well. Even though it was a fairly open winter, it wasn't extremely cold."

Town evacuated

North Dakota's troubles began with blizzards and super cold temperatures. Subsequent flooding hit parts of the Midwest on April 6 and continued for days. Fargo, N.D. was virtually shut down, as were state highways, due to blizzard conditions, and residents of Montevideo, Minn. were looking at a swollen Minnesota River ready to overflow its banks in chilly 40 mph winds.

Grand Forks, N.D., was evacuated during the third week in April.

"For the last couple weeks we've had our people out helping other people sand-bag," said George Sholy, of S&S Landscaping, Fargo, N.D. Sholy said many of his clients' properties were under water, but the worst damage

was in Grand Forks, where the Red River crested at 54 feet.

Steve Snortum, owner of Snortum Nursery, Granite Falls, Minn., called the floods there "the worse since 1969.

"Bridges have washed out, the Salvation Army's here, and it's snowing so it's kind of bleak," said Snortum.

Thinking positive

On the upside, Snortum predicted future business activity from lawn renovations, even though the profit margin on the service is low.

Also, the floods will obviously delay landscape installation projects.

"Renovations will be needed due to the mud; the

'Career Days' hits big numbers in Texas

DALLAS— Some students climbed trees. Others covered a parking lot with an irrigation grid. A few dozen tried their best to identify weeds and turf, while some made sales presentations to the pros.

It was all part of The Associated Landscape Contractors of America's 21st Annual Student Career Days competition, held at Richland College March 20-23.

A reported 550 students from 39 schools came in for the event, which each year tests the landscape and horticulture smarts of students enrolled in two- or four-year colleges across the country.

"This is definitely going to go down as one of the best Student Career Days we have ever had," said Career Days Chairman, Drew St. John, II, CLP, of St. John and

to a strong economy, a good central location and an enhanced awareness of ALCA and its curriculum programs across the country.

Students competed in 20 events that tested school teams on skills and ability to implement sound landscaping practices and principles, including design, sales skills and plant identification.

A look at the 'real world'

Mike McPherson of the Oregon Landscape Contractors Association helped judge the irrigation installation event.

"This gives you a chance to see how technical it can be," said McPherson. "It gives the students a good idea of what they're up against."

"Most of [the irrigation contestants] have a lot to learn. But that's what we expected," said another judge. "You can tell the people who have worked in the field from the ones who have had only book learning."

Mike Seneff, president of Plant Interscapes, attended the Sales Presentation competition, in which students were expected to "sell" a contract to a client, played by an industry professional.

"Most of the students took the presentations very seriously in terms

National Guard trucks driving across people's lawns; front-end loaders; and sand bag debris," said Snortum, whose business was not flooded.

"We normally begin to install landscapes about the second week in April. Right now we don't have a cash flow due to the blizzard and flooding. The one advantage to all this is that we have a great opportunity to get our garden store organized and the plants potted."

PLCAA director job a hot item

Jeffersonville, Ind.—Lots of people want to be executive director of PLCAA, headquartered in Marietta, Ga. Within several weeks of advertising for a new executive director, the PLCAA search committee had received 178 responses.

"Frankly, I was surprised at the number," says Larry Messina, chairman of the search committee and PLCAA president-elect. Messina says the committee is narrowing its list of candidates, and hopes to present its recommendations at the PLCAA board meeting May 16-17.

The search committee advertised the opening in the *Washington Post*, *Atlanta Journal-Constitution* and *Chicago Tribune* newspapers in addition to several trade magazines directed at association officers.

"We have some excellent people who have applied for the position. We feel confident that when we get down to our final decision we will have a very, very qualified person," says Messina.

Ann McClure, who had served as PLCAA executive director for six years, left the job in April to manage the International Gas Turbine Institute.

Green industry publisher dies at 76

CLEVELAND—James A. Nelson, who began *Weeds Trees & Turf* magazine—which was later renamed *LANDSCAPE MANAGEMENT*—died April 16 in a nursing facility in Lakewood, Ohio. Cause of death was a brain tumor.

Nelson began *Weeds Trees & Turf* and *Pest Control* magazines as part of his Trade Magazines, Inc. company, which also published books. Both magazines are now published by Advanstar Communications, headquartered in Cleveland.
