#544

As manufacturers expand controller capability and size, we create convenient solutions to easily adapt our remote control systems. To eliminate hardwiring, we produced Receiver Cards for quick and easy, permanent installation that are capable of operating up to the controller's station capacity. With one transmitter you can control Receiver Cards for Rain Bird® ESP MC & LX, Superior Sterling and Irritrol® Dial & MC controllers. We also offer portable, universal models for all 24VAC controllers.

PlanetAir Aerator

...with its patented planetary motion and unique coring tine design, relieves the hard pan effect. A soil-relieving tine is also available that truly aerates with no cleanup.

The 12 tines penetrate the earth to a depth of 4 inches with a span of 48 inches wide. The tractor's forward speed determines hole spacing, making the PlanetAir highly productive with low PTO horsepower requirement. Cleanup is minimal due to its pulverizing capability.
