As manufacturers expand controller capability and size, we create convenient solutions to easily adapt our remote control systems. To eliminate hardwiring, we produced Receiver Cards for quick and easy, permanent installation that are capable of operating up to the controller's station capacity. With one transmitter you can control Receiver Cards for Rain Bird® ESP MC & LX, Superior Sterling and Irritrol® Dial & MC controllers. We also offer portable, universal models for all 24VAC controllers.

Seed Aide® Mulching Granules.

Seed Aide can be applied by
hand or with a broadcast
spreader. No significant
equipment purchase is
required. Seed Aide's granu-
lar texture absorbs water
rapidly, swells, and as rain-
drops impact the swollen
particle, Seed Aide flattens to
better cover the soil surface.
This reduces sediment and
water runoff. An organic
tackifier holds the mulch in

place reducing soil erosion. A bio-stimulant increases root
mass and enhances the stress tolerance of the turfgrass.

For detailed information,
