## Wall-to-wall

▲ Cosella Dorken Products says its DELTA-MS is an effective remedy for "wall weep," or the stains left on retaining walls when water seeps through joints or fissures. This dimpled, high-density polyethylene membrane controls water flow and provides a cushioning layer that buffers walls against expansion and contraction of soil due to freeze-thaw cycles. It's available in rolls from 3 ft. to 9.8 ft. wide and 65.6 ft. long, and unrolled along the wall and affixed near the top using either a termination bar or L-shaped flashing plus two courses of nails and plugs just below. For more information call 888/4DELTA4 or visit [www.deltams.com](http://www.deltams.com) / circle no. 274

▶ Anchor Wall Systems' interactive multimedia training program for retaining wall installation features a CD-ROM with virtual reality animation and video that showcases basic wall construction, as well as retaining wall building instruction for terraces, curves, radii, steps, fences, guard rails and water applications.

For more information or to obtain the CD-ROM, call 800/473-4452 / circle no. 275

▲ Want to know the advantages of building a tiered retaining wall system rather than a single, taller wall? Then check out Versa-Lok's technical bulletin on tiered retaining walls, which covers slope stability, foundation evaluation, drainage and geogrid placement. Line drawings and photographs help illustrate these and other points. For more information or to obtain a copy of the bulletin, call 800/770-4525 or log on to [www.versa-lok.com](http://www.versa-lok.com) / circle no. 276

▲ Barco Products' recycled plastic landscape timbers are perfect for small retaining walls, walkway and garden edgings, planters and pond enclosures. They resist rotting, splintering and insect damage. The timbers measure 8 ft. X 5.5 in. X 5.5 in., feature an interlocking edge and pre-molded knockout holes for rebar rod reinforcement, and can be cut and drilled with conventional hand tools. For more information call 800/338-2697 / circle no. 277
