Green blocks

Integrity Block provides a green replacement for concrete block. The replacement is environmentally friendly and meets the same performance standards as existing materials. It can be used for structural, architectural and landscape applications that can generate valuable LEED credits. www.integrityblock.com or 650/641-3104

Extra traction

Caterpillar's new 279C, 289C and 299C are compact additions to its line of rubber-track loaders. They feature two-speed drive systems, a maximum speed of 8.5 mph, and steel-embedded track and steel undercarriage components for durability.

Strong in snow

The auger housing on Husqvarna's new XLS snow thrower series is 40% stronger than its standard auger housing for added strength and durability. A high-speed impeller throws snow up to 50 ft. Other features include an aggressively serrated auger, maintenance-free gearbox, halogen headlight, power steering and built-in hand warmers. www.usa.husqvarna.com or 800/HUSKY-62

New versatility

meets same optimum performance.

The new Brillion LSS6 seeder features mounting capabilities for both skid steer loaders and tractors, adding flexibility to landscape management.

The LSS6 seeder uses Brillion's time-proven blade agitator metering system to provide accurate and reliable seed placement for a wide variety of seed sizes.

The LSS6 itself is 84 inches wide with a seeding width of 72 inches and a hopper capacity of 4 1/2 bushels.

To find out how the versatile new LSS6 Skid Steer Landscape Seeder can work for you, contact your local Brillion dealer or call Brillion Iron Works for more information.

Big dog

Features of Kuhns Power Equipment's Power Dog hydraulic powered tiller include dual rotating tines, a quick-adjust tilling depth, variable speed on the go, and clean, easy-to-adapt controls. The series, which is made in the U.S. and includes Power Dog 209 and Power Dog 213, also increases ground clearance and evens the soil as you till. 866/505-8085

Portable power

The new Honda Portable Power System (HP2S) combines a Honda generator, a smart transfer switch and a battery backup (uninterruptible power supply, or UPS). When utility power is interrupted, the UPS maintains power to the pre-selected emergency systems (such as lights or garage door opener) while the user turns on the generator. Once the generator is powered up, the HP2S transfer switch automatically transfers power to the pre-selected systems. www.honda.com or 800/426-7701

Biodiesel ready

All 2009 model year Toro Dingo TX 525 wide track and TX 525 narrow track diesel compact utility loaders will be biodiesel compatible for blends up to B20, which represents a mixture of 20% biodiesel and 80% petroleum diesel fuel. Biodiesel is a biodegradable, non-toxic alternative fuel derived from biological sources. www.toro.com/dingo or 800/DIG-TORO

Speedy delivery

The new Boxer 106 Power Barrow is a motorized, four-wheel-drive wheelbarrow designed to move materials quickly and safely across terrains less navigable for traditional wheelbarrows and competing products. Powered by a Honda GXV160, 5.5-hp gasoline engine, it can travel up to 3.5 mph and transport up to 850 lbs. in a single load. Lugged tires come standard; turf tires are available for use on delicate ground, such as sports fields. www.boxerequipment.com or 800/476-9673

U.S. LAWNNS.

GROW YOUR LANDSCAPE MAINTENANCE BUSINESS.

Want to Own a High Profile Franchise?

Does your business provide:

- Economic Stability
