livescapes  PRODUCTS

Divine style

Kichler Lighting's new Cathedral Collection features seven coordinating lighting products with cathedral-inspired detailing to create a high-styled, cohesive look throughout the

landscape. Each durable die-cast aluminum piece is finished in a textured bronze powdercoat. Products in the collection include a wall-mounted planter, low-voltage pendant, two deck light styles, path light, bollard light and the pictured standing lit planter, which spreads a shadow onto path and patio surfaces while illuminating potted flowers or plants. www.landscape-lighting.com

Get smart

Developed for commercial tree growers, the Smart Pot series are soft-sided, fabric containers have the rigidity to hold their shape while supporting a plant. The aeration container features the ability to air-prune and enhance a plant's root structure. After all, a highly branched, fibrous root structure is the key to growing a better plant — with more flowers and fruits, and more resistance to insects and disease.

Sustainable solution

Strata Systems' new Neoweb is a honey-combed, cellular confinement system (geocell) that, when filled with soil, stabilizes soft soils, reinforces pavement structures, and provides a durable reinforcement solution. It can be customized to the specific project and application. Cell heights range from 3 to 8 in., and sections are tri-folded, shrink-wrapped and palletized for shipment. www.geogrid.com

BENARY VARIETY FOCUS:

RUDBECKIA HIRTA 'DENVER DAISY'

Growers will love this new Rudbeckia because of its high germination and large stands of usable seedlings. At 18 to 20 in. tall, the 'Denver Daisy' is perfect for 1-gallon production or for large landscape plantings. Flower power is no understatement for this beauty as large masses of golden

flowers adorned with rusty red rings cover the 'Denver Daisy' from late spring until first frost. Strong, dense flowers stems ensure it won't flop or fall over in adverse weather conditions. This heat-loving beauty is able to thrive in diverse and rugged areas.

True to form

Primescape Products' new Flexi-Liners conform to the shape of each container to prevent leaks. Made from soft, flexible plastic that can be cut or bent as needed, they're easily trimmed to fit with a standard pair of scissors. The liners also help prevent calcium deposit buildup on the surface of the planters, as well as prevent excessive evaporation. They're available in a range of sizes, from 8.3 to 31.5 in. top diameter. Primescapeproducts.com

Drainage for a cause

Place a reusable PotHoles Drainage Disc at the bottom of a pot, add soil and plant — the hydroponic filter holds moisture for plants while improving oxygen flow. Available in four sizes (5, 6.5, 8.5 and 11.5 in.), the product has the added benefit of aiding lung cancer research: 5% of all Internet sales and 5% of PotHoles' profits go to the Christine J. Burge Endowment for Lung Cancer Research at the University of Colorado Cancer Center. www.gotpotholes.com

Handy rake

Looking for the best way to clear debris from flower beds, around plants and from other hard-to-reach areas? The Oxo adjustable hand rake, part of its Good Grips series, features easily adjustable tines that lock into place at a spread anywhere from 3 to 12 in. Simply unlock the adjuster and slide forward or back to increase or decrease the spread, then securely lock into place.

Fully retract the tines for getting into tight areas or for compact storage. Fully expand the tines for clearing larger areas. The 12-oz. rake also features a dual position handle for added reach with optimal comfort and a soft, nonslip grip. www.oxo.com
