## Winter green

Turf Revolution's new Time Sav'r topdressing is pelletized, dehydrated compost from leaf and yard trimmings. It's easy to apply with a fertilizer spreader, and contains just 10% water (vs. regular compost, which can be up to 50%). The low-odor topdressing is easy to spread, and does not contain manure or animal byproducts. It increases soil water-holding capacity, resulting in increased drought tolerance and increased irrigation efficiency. It also increases soil nutrient holding capacity, maximizing plant nutrient uptake. [TurfRevolution.com](http://TurfRevolution.com) or 800/823-6937
