

Parallel design

Henke's new Parallel Lift Plow is designed to remain parallel to the ground in transport or in angling positions. It can be completely removed from the truck hydraulically, leaving only a flat plate. The truck hitch and power reversing and lifting mechanisms remain with the plow. The plow features an inverted "J" shaped, 43-in. high moldboard with 10 vertical ribs. The moldboard is available in steel or polymer in 10-, 11- and 12-ft. lengths. *HenkeMfg.com*

Electric start

Ariens' Sno-Tek single-stage snow thrower is powered by a 205cc Briggs and Stratton engine and features a 22-in. clearing path. A Quick Chute deflector rotates 200 degrees, so operators can keep snow off previously cleared areas. The single-stage Sno-Tek is easy to start, and the aluminized Lo-Tone muffler resists corrosion while minimizing noise. The 86-lb. unit can discharge snow up to 40 ft. and features a two-year limited consumer warranty. *Ariens.com*

Multi-tasking machines

The **Gravely Rapid M** and **Rapid E** two-wheel tractors are powerful all-in-one machines, featuring five different attachments: snow blower, blade, brush, mowing deck and car pusher. Both models feature a hydrostatic drive system and pistol-grip controls to make operation easy. Operator-friendly controls and handle with tool-less height adjustments and side-to-side adjustments helps to make short work of any job. Available with a two-year warranty. *Ariens.com*

Move large volumes

The Boss BX-12 is the first box plow designed for professionals seeking to remove large volumes of snow in a single pass. Easily attaching to a loader or backhoe, it features a 12-ft.-wide sectioned trip edge, featuring segmented cutting edges that allow each 8-in. cutting edge segment to trip individually. This keeps the remaining cutting edges in contact with the surface and pushing snow for maximum efficiency. Articulating end plates are self-leveling to keep the scraping edge surface closely in contact with the pavement, reducing wear and tear on the shoe heel and the impact felt when an obstruction is struck. During plowing operations, the Quickhitch system's vertical hitch float lets the box plow slide up and down, also reducing wear and tear on the tractor, operator and plow. BossPlow.com

Zero-turn maneuverability

Grasshopper's zero-turn FrontMount power units serve as the heart of a complete snow removal system comprising commercial snowthrowers, dozer blades (pictured), rotary brooms and V-plows. Applying zero-turn maneuverability to snow removal saves time and labor so each operator can accomplish more work in less time. Grasshopper's exclusive QuikConverter implement system lets you install and remove implements in minutes without tools. An optional winter enclosure (for 700 and 900 Series) and 16,000 BTU/hr heater (for liquid-cooled models) protect operator from the elements for enhanced comfort and efficiency. ThrowMoreSnow.com

Tow-behind

SnowEx's new SP-7000 Tow Pro spreader features a 1.4-cu.-yd. capacity. It tows behind tractors and UTVs with a lawn and garden hitch, eliminating the need to mount a large spreader in the truck bed. This helps maximize the truck's utility by freeing the bed to carry additional spreading materials or peripheral pieces of equipment, such as walk-behind spreaders and snow blowers. It's designed for treating parking lots and garages, college campuses, private roadways, and other off-highway uses. With an 18-in., stainless steel spinner, the unit can spread material up to 30 ft. wide. For maximum control of the spread pattern, the spinner can be tilted between 0° and 15° downward.

Save time and energy

John Deere's Frontier SB2176 snow blower has a quick-attach feature, allowing operators to mount the blower without removing the John Deere 400 Series' loader. The blower is driven by an independent, hydraulic three-point hydraulic power pack that attaches to the rear of the tractor. Self-contained and driven by the tractor's rear PTO, it is also Category 1- and iMatch-compatible. It features a 76-in. working width and automatic auger speed control to prevent clogs. Six anti-scalp wheels are located at all four corners and the front center position of the deck. The cutting edge is replaceable, and the steel skid shoes are adjustable and replaceable. Deere.com

Clean sweep

Ranging in width from 96 to 120 in., **Case Construction Equipment's** new angle brooms enable Case wheel loaders to sweep streets and parking lots, clean up jobsites and remove snow from jobsites. Angle broom models are available for Case 521D and E, 621D and E, 721D and E, and 821E wheel loaders. The brooms feature durable poly-wire brushes, broom heads that adjust 30° left or right and an integrated nozzle for applications requiring water for dust control. The brooms attach to the CNH Quick Coupler (JRB-compatible) for wheel loaders. Quick-change hydraulic fittings enable the operator to attach and detach the broom without disrupting hydraulic lines. Adaptable plow

With its ability to switch between a rubber edge and steel trip edge, the new Switchblade containment plow can handle changing weather and jobsite conditions without having to change plows. Its steel edge features **Pro-Tech's** patented IST technology, which includes a steel edge mounted on a specially blended memory urethane. When an obstruction is hit, the edge flexes and snaps back to its original angle in a smooth, non-shocking trip action. Because the new design uses a cutting edge that spans the entire width of the unit, the Switchblade eliminates snow trails at its sides. A total of 12 models are available. ProTechCorp.com
