

## Power play

New for 4X4, half-ton and 1-ton trucks and SUVs, **THE BOSS Snowplow** introduces a 7.5-ft. Power-V XT Plow featuring a high-performance cutting edge, built-in curb guards and a snow catcher. Flared blade wings with an enhanced curl throw snow higher and farther than straight-blade plows for improved efficiency and less time on the job, the company says. An enclosed hydraulics package protects against corrosion and hydraulic freeze-up. A two-year limited warranty covers parts and labor. [BossPlow.com](http://BossPlow.com)

## Clean sweep

The LB540 Power Broom is designed for the **Ventrac** 3000 series tractor. It can sweep and remove snow, leaves, dirt, light gravel and other materials from parking lots, sidewalks and other surfaces. Heavy-duty nylon bristles make short

work of any clean-up job without damaging the surface below. A hydraulic cylinder angles the broom left or right from the operator's seat. Adjustable gauge wheels set the height of work for precise adjustment. Optional outrigger wheels allow for controlled adjustment when de-thatching turf. An optional front debris curtain is available for less overthrow of material. [Ventrac.com](http://Ventrac.com)

## Ice management

**SnowEx** presents its new, electric-powered push sprayers for sidewalks and other small areas. Available with a powder-coated steel frame (SL-80) or stainless steel frame (SL-80SS), both sprayers have a 13-gal., corrosion-resistant polyethylene tank. Each model includes an adjustable-height boomless nozzle, which sprays most salt brine and liquid ice melters up to 48 in. wide. The units also come with an adjustable spray wand for spot-spraying applications. A 12-volt electric pump and rechargeable battery powers the units. The pump is rated at 2 gpm at 60 psi.

**Versatile performer**

The FFC V-Blade attaches to skid-steers and compact wheel loaders up to operating weights of 13,200 lbs. It easily adjusts to achieve straight, left/right, scoop or V-position, providing the versatility needed to efficiently remove snow from walks, driveways and parking lots. It comes in blade widths ranging from 60 in. to 120 in., and is available with a Hydraulic Sequencing Valve or **Paladin Construction Group's** electro-hydraulic system, which improves blade control and independent blade function. Other features include a reversible cutting edge, fully adjustable skid shoes, and top and side pinch guards. The FFC V-Blade is engineered with fewer components and less hardware than other adjustable snow blades, making it up to 200 lbs. lighter than other models and easier to maneuver. In addition, the design incorporates a robust central ball joint that allows for improved multi-axial movement. *PaladinConstruction Group.com*

**Heavy-duty construction**

**Loftness'** line of snow blowers accommodates many makes and models of skid-steers and tractors. Seven skid-steer models are available in 72- to 84-in. widths. Each features a universal coupler, a single motor design and an electric spout rotator. A total of 11 rear-mount, PTO-driven tractor models are also offered with one-, two- or three-auger configurations. Available in 60- to 108-in. widths, they accommodate tractors with 540- or 1,000-rpm PTO drives and 16- to 200-PTO horsepower. The units feature two-stage designs for efficient operation. *Loftness.com*
