Tension fabric buildings

Legacy buildings use a durable rigid frame in place of the hollow-tube, open web truss framing traditionally used for fabric buildings. The solid structural steel beams are not vulnerable to unseen corrosion originating inside a tube. Additionally, the company says the hot dip galvanized framework provides years of low-maintenance use.

T370 trucks

As Clintar Landscape Management's mainstay truck in its snow removal business, the Kenworth T370 in single- and tandem-axle configurations spread salt and a salt-liquid mixture in government and private sector parking lots throughout the southern Ontario and the Maritime provinces. During the spring and summer, the salt boxes are removed so the trucks can haul gravel and mulch. Some are outfitted with 1,000-gal. tanks so Clintar can use them for watering sod installations or for power washing operations. Kenworth Truck Co. // Kenworth.com
