Turfco T3000i and XT5

For more than 50 years Minneapolis, Minn., -based Turfco Manufacturing Inc. has been working to provide landscape professionals with the most innovative lawn maintenance equipment and latest technology. Years of research and development, coupled with customer feedback and rigorous testing, give Turfco equipment a reputation of quality and trust. Since the company was founded, Turfco has been listening to customers' wants and needs and using input to drive innovation and improve products.

"We pride ourselves in listening to feedback and making improvements that will help landscape contractors do their job better, faster and easier," says Scott Kinkead, Turfco's vice president. "We aim to maximize a contractor's time so they can maximize their profits."

Two of Turfco's most recent products — the T3000i spreader sprayer and TurnAer XT5 — exemplify Turfco's dedication to innovation.

The T3000i spreader sprayer coupled with the optional 3-in-1 Auxiliary Tank provides maximum productivity thanks to the integration of four years of customer feedback. The versatile T3000i spreader sprayer is small enough to fit through a 36-inch gate, yet productive enough

for large commercial properties, resulting in easier route management and increased efficiency. It also allows contractors to use the same machine on residential and commercial properties.

The machine's innovative hands-free speed control system allows operators to keep one hand free at all times to run the spreader sprayer. When coupled with the 3-in-1 Auxiliary Tank, the T3000i can spray up to 124,000 square feet.

Larry Ginger of American Lawn Care in Des Moines, Iowa, says, "The T3000i is so versatile that you're able to treat everything from small residential properties to large commercial ones. In fact, one of our operators was able to treat 18 acres in seven hours."

The TurnAer XT5 is another patented Turfco product. It uses Turfco's revolutionary TurnAer technology, allowing the operator to turn and reverse while the tines are still in the ground, thus eliminating the need to stop, lift and turn at each pass. A variable speed hydrostatic drive system gives 50 percent more productivity than traditional aerators, and a new

gear ratio system increases aeration speed by 14 percent. For improved performance and control on hills, operators can adjust the

weight in the back of the aerator with the XT5's weight system.

Innovative lawn maintenance equipment isn't the only factor setting Turfco apart. Turfco has also pioneered a new customer service model in the landscape industry. Through Turfco Direct, customers can buy directly from the company online or by phone, instead of working through a dealer. Starting with an overview of all purchasing options and ending with direct delivery, Turfco ensures landscape professionals receive personalized service.
