SWINGFOG WITH S.M.C.P. MALATHION ENDORSED BY

Mr. E. Turberville, horticulturist at Sarasota Jungle Gardens, says: "The combination of Swingfog and Malathion does a wonderful job — we do not know what we would do without it. We have tried two other foggers, but the Swingfog is by far the best we have had. Our Jungle Gardens are fogged each morning and we have successfully controlled the nuisance of mosquitoes and other insects. We heartily recommend this combination for economy, effective results and ease of operation."

The efficient insect-killing power of MALATHION with the easily operated SWINGFOG cuts the cost of manpower and materials, gives greater coverage in less time. Two acres can be fogged within 20 minutes.

MALATHION has all the power of phosphate-type insecticides with lower toxicity to man. The completely portable SWINGFOG goes anywhere a man can walk.

The SWINGFOG offers instant starting, choice of droplet size, complete atomization, safe fuel injection — has only two moving parts.
