

Control Insects *this better, safer way!*

USE SEVIN[®]

INSECTICIDE

Effective and long-lasting SEVIN provides powerful control of major insect pests of trees and shrubs. SEVIN is safer to handle and safer to birds and wildlife than most other insecticides.

You knock out chinch bug, sod webworm and many other turf pests easily with SEVIN. It is deadly to insects, and its lower toxicity to humans, pets, birds and fish makes SEVIN ideal to use in any turf area.

SEVIN controls Japanese beetle, rose slug, codling moth, leafhopper and other insects on garden trees, flowers and vegetables—with few applications. Versatile SEVIN controls more than 150 different insects.

Gypsy moth, cankerworm, forest tent caterpillar and other major pests of forest and woodland trees are readily controlled with SEVIN insecticide. Drift is no problem, even to nearby pastures, fields or streams.

SEVIN insecticide gives you a wide margin of safety in insect control programs that provide effective, long-lasting, economical results. Powerful against insects, but safer to handle and use than most other insecticides, SEVIN is ideal for use by your spray crews in urban and suburban areas as well as in country recreation developments. For detailed information, contact: Union Carbide Chemicals, 270 Park Ave., New York, N. Y. 10017.

SEVIN is the registered trade mark of Union Carbide Corporation for carbaryl insecticide.

You can now kill brush on a year 'round basis

The key: Dormant Cane Broadcast — Scientists' concepts of chemical brush killing used to be that woody plants could not be effectively controlled with winter-month application. Diamond, however, sponsored research on this unique application method of brush control with the use of six-pound acid equivalent Line Rider formulations. The results speak for themselves:

• Materials needed reduced • Application time in

hours per acre reduced • Kill effectiveness increased • Effective spray season lengthened • Hazard of crop damage eliminated • Unsightly brown-out eliminated.

Diamond's experience and specific formulation techniques with dormant cane broadcast can be of help to you. For details on dormant cane broadcast or six-pound Line Rider products, write Diamond Alkali Company, 300 Union Commerce Building, Cleveland, Ohio 44114.

VICHEM FUNGICIDES & HERBICIDES

for
treatment
and
maintenance
of
fine turf

These specialty products, developed specifically for golf course and park use, are now available for the treatment and control of fine turf grasses. VICHEM research in agricultural chemicals has produced such outstanding developments as DSMA—DiSodium Methyl Arsonate; AMA—Ammonium Methyl Arsonate; CPA—Calcium Propyl Arsonate; CALAR—Calcium Acid Methyl Arsonate.

... the finest chemicals to protect your finest turf.

COMPARE THESE FEATURES:

Over-size bronze gear pump by Oberdorfer

runs at slow speed (600 RPM) which means less wear — longer life.

Carbon bearing pump head permits use of both oil and water based materials.

Easy pressure adjustment by hand wheel. No tools required. Permits return line system for agitation of chemical.

Special skid pan for sliding across lawns and non-roll transportation in cars.

COMPLETE with pressure gauge, gun-jet valve, 3 hp. Briggs & Stratton engine, 100' 3/8" i. d. hose, pressure regulator, adapter, 4 nozzles, extensions, quick-couplers \$258.50

Freight allowed on all shipments East of Mississippi. Elsewhere in U.S. add \$6.00

PREVENT...CONTROL TURF FUNGAL DISEASES

Prevent ugly, unsightly spotting caused by turf fungal diseases. Maintain lawn health and beauty all season by spraying with Panogen Turf Fungicide. This hard-working lawn care chemical has been proven effective against all common turfgrass diseases. It can be used to prevent disease... or to control an outbreak during the early stages.

Panogen Turf Fungicide is a liquid concentrate. You simply mix it with water and spray on the grass. It's safe, economical, easy-to-use. Ask your chemical supplier for Panogen Turf Fungicide soon.

**Changing
Your Address?**

If so, notify our circulation department right away to be certain the magazine reaches you at your new location. The Post Office won't forward your copies. So when you write us, make it at least three weeks in advance of your moving date, and include your old address, as well as the new one. We'll see you don't miss a single issue. Send this old and new address information to:

**Circulation Department
Room 303
1900 Euclid Avenue
Cleveland, Ohio 44115**

**FOR SAFE
SPRAYS
USE
PRATT'S**

Arborists and Custom Spraymen have depended upon PRATT'S for quality spray formulations for over half a century.

Start your schedule with SCALECIDE — the "dean" of the Oil Sprays. So safe that it can also be used as a foliar spray.

Pratt's formulates a complete line of emulsifiable concentrates for hydraulic and mist blowers and oil base concentrates for thermal fog equipment.

Send for our free circular, "Pratt's Spray Bulletin for Shade Tree Spraying."

B. G. PRATT COMPANY

203 21st Avenue • Paterson 3, N. J.
