

This year there are fewer weeds because of "Ansar"[®]

PROGRESS REPORT: ● In the brief span of two years "Ansar" herbicides have compiled a remarkable record in the eradication of weeds—especially Johnson Grass—in cotton and non-crop areas. ● Cotton growers have kept our plants working at top capacity night and day to meet the demand . . . and as a result we'll shortly start construction of a new multi-million pound capacity "Ansar" plant!

● A new product, "Ansar 529" (170 with a surfactant added) will simplify mixing—make the product far easier to use. ● Other "Ansar" products for control of weeds in irrigation ditches, orchards and a variety of non-crop areas will be available very soon. Today "Ansar" is the first name in herbicides . . . a product of
THE ANSUL COMPANY, MARINETTE, WIS.
