

Let **Myers** Show You...

the Sprayer
with the

VERSATILITY

that pays off!

Myers DU-ALL Sprayers are the pick of professional applicators. Why? Because DU-ALL Sprayers provide the versatility that is so important for the many different spraying jobs a professional applicator is called upon to perform.

In the Myers DU-ALL Line, you can choose from wheel or skid-mounted models, pumps from 2-10 gpm and tanks in 150 or 200 gallon sizes. Boom attachments, guns and many other accessories are available as optional equipment. Myers also offers a full line of other sprayers that feature pumps with 2 to 50 gpm capacities, pressures to 800 lbs. and tanks in 12½ to 1,000 gallon sizes.

Make the most of your equipment investment by specifying Myers. For complete information and help in making your choice of spray equipment, see your Myers Sprayer Dealer.

Myers ...the finest name in power sprayers

The F. E. Myers & Bro. Co.
ASHLAND, OHIO / SUBSIDIARY OF MCNEIL CORPORATION

This is **WHITE GRUB DAMAGE.**
For the answer to it and other
summer turf problems, see below:

White grubs and Sod webworms. For long-lasting protection from these and other turf insects apply Chlordane. Gets rid of moles and skunks, too.

Brown patch and Dollar spot (bluegrass). Apply Velsicol® "2-1" for effective, economical prevention or cure of these and other turf diseases. New formula provides improved wettability, better stability, and less foaming action.

Gray leafspot and Fairy ring. Velsicol® Memmi .8EC protects warm and cool season grasses from these and other turf diseases. Memmi .8EC is a liquid mercurial fungicide—mixes in minutes, needs no constant agitation, won't clog nozzles, leaves no sediment in spray tank!

Mouse-ear chickweed and Knotweed. Banvel® D 4S attacks weeds through leaves and roots, kills most species found in turf. Works in warm or cold weather!

Plantain. Banvel® D+2, 4-D combines the effectiveness of Banvel with reliable, versatile 2, 4-D to give you one-application control of practically every broadleaf weed found in turf. Saves time—gets the job done quicker at lower cost!

Urox B New From General Chem.

Long-term, nonselective weed control may be achieved with a new, completely organic, soluble, liquid-type herbicide, according to General Chemical Division, Allied Chemical Corp.

Called Urox B Water Soluble Concentrate, the new weedkiller is fully soluble in any amount of water, General Chemical reports. It may be used in spray equipment having very little tank agitation, because, unlike

wettable-powder-type products, once in solution it stays in solution, company officials say.

This new liquid herbicide, containing 4 pounds of Bromacil, is available in 1-, 5-, and 30-gallon steel containers. It is particularly applicable for industrial sites, railroads, and highways.

For complete details on this new product, write to General Chemical Div., Allied Chemical Corp., 40 Rector St., New York, N.Y. 10006.

PRODUCTIVE

TRIANGLE BRAND COPPER SULFATE

resembles the rabbit in one sense at least: both generate results. Copper Sulfate is widely recommended for treating reservoirs, ponds and lakes... irrigation and filtration systems... pipes and drains... to overcome plankton and filamentous green algae. Nothing else yields such good control. Crash programs clear away scum, murkiness and algae odor within five days. Used in the early stages of algae growth (the better way) Copper Sulfate maintains good conditions... economically.

Extra benefit: Copper Sulfate also destroys roots growing into conduits, sewers and drains without sacrificing trees and ornamentals. Literature on request. Write, stating your interest. And rely, when you buy, on Triangle Brand.

Trimnings

On the Beam at Abalene. Back in the early days of this publication (which seems like ancient history now!) we wrote a small piece for this column about Abalene Spray Service, a large, multibranch contract applicator firm based in Poughkeepsie, N.Y. The firm was then expanding into weed control and now we learn, through the company's Robert C. Gardner, that a further step towards diversification has been taken with the establishment of a tree service division, which Bob manages. He spent 10 years with one of the leading pioneers in tree work and joined Abalene to set up the new division. In addition to tree maintenance, Abalene is active in industrial weed control, turf management, and aquatic weed work, Bob writes. He says he uses *WTT* as a sourcebook of information for his men, and comments about his company, "Quite an array of services, isn't it?" We wholeheartedly concur that they're all on the beam at Abalene!

Rest on His Laurels? We doubt that Henry J. Kohankie, a retired nurseryman and horticulturist from Painesville, Ohio, is a man to rest on his laurels, although he was recently given an honorary membership in the International Shade Tree Conference. Henry, 77, still enjoys working around his grounds at home and keeps up to date on his profession. The award was presented by the Ohio ISTC chapter president M. W. Staples. Mr. Staples is city forester for Kent, Ohio, and an associate of the Davey Tree Expert Co.

Omura the Merry. We've had a lot of correspondence in the last few weeks with Jim Omura, landscape contractor and versatile vegetation control expert from Denver, Colo. Jim just retired as president of the Landscape Contractors of Colorado, after two terms in the office. Kenneth Jenner, executive director of the Associated Landscape Contractors of America, had high praise for Jim's accomplishments in office, and we join our voices to the chorus of praise for his many contributions to industry advancement. He was succeeded to the LCC top post by Wayne Parr, landscaper from Englewood, Colo.

* * *

Huzza for Hafstad! We understand retiring International Shade Tree Conference Midwestern Chapter president Dr. George E. Hafstad gave a truly inspiring welcome address during the group's meeting in Chicago earlier this year. Dr. Hafstad, who is Plant Pathologist with the Wisconsin Department of Agriculture in Madison, said, in closing his talk on the value of trees, "Cities now remove a tree because it is in the way of a utility pole. I long for the day when cities will remove the utility pole because it is in the way of a tree." Dr. Hafstad is noted for his long service to the furtherance of the appreciation of trees in the Midwest.

**there's an easier way to get rid of weeds
and woody plants—without killing grass!**

WEED and BRUSH OFF

Amine Formula 400

sprays away stubborn weeds quickly, safely!

WEED and BRUSH OFF is a fast-acting, liquid formula you can depend on to get rid of weeds and woody plants — without damaging grass!

Just apply with any ordinary spray equipment — quickly destroys such tough-to-kill weeds and woody plants as common chickweed . . . dock . . . plantains . . . ragweed . . . poison ivy . . . and sumac. Emulsifiable in water or miscible in oil — completely safe around humans and animals when used as directed. Concentrated power permits greater coverage — one gallon diluted in 100 gallons of water treats approximately 20,000 square feet.

Write Wood Treating today for name of your nearest WEED and BRUSH OFF dealer!
