Let **Myers** Show You...
the Sprayer
with the
VERSATILITY
that pays off!

Myers DU-ALL Sprayers are the pick of professional applicators. Why? Because DU-ALL Sprayers provide the versatility that is so important for the many different spraying jobs a professional applicator is called upon to perform.

In the Myers DU-ALL Line, you can choose from wheel or skid-mounted models, pumps from 2-10 gpm and tanks in 150 or 200 gallon sizes. Boom attachments, guns and many other accessories are available as optional equipment. Myers also offers a full line of other sprayers that feature pumps with 2 to 50 gpm capacities, pressures to 800 lbs. and tanks in 12½ to 1,000 gallon sizes.

Make the most of your equipment investment by specifying Myers. For complete information and help in making your choice of spray equipment, see your Myers Sprayer Dealer.

Large rubber wheels permit easy handling.

New Multiuse Sprayer Developed by Oakes

Contract applicators, nurserymen, and all sprayers of chemicals now have the opportunity to use a newly designed, multi-use power sprayer marketed recently by Oakes Mfg. Co.

Boasting a porcelainized 20-gallon steel tank, the new "2025 Trojan" is said to be completely portable. Manufacturers also claim the tank will not be pitted by any insecticide.

Powered by a 2½ h.p., four-cycle motor, the Trojan comes equipped with large rubber wheels, allowing easy manipulation of the unit. It has a chrome-plated steel handle which serves as a parking stand.

Another important feature of the new sprayer is its centrifugal Fiberglass pump which assures jet agitation and 60 to 70 pounds of spraying power.

Further information on the sprayer may be obtained by writing Oakes Mfg. Co., FMC Corp., Tipton, Ind.

Western Shade 'Trees' Congregate This Month

Western Branch of the International Shade Tree Conference will hold its 32nd annual get-together June 20-23 at the Miramar Hotel in Santa Barbara, Calif.

"Trees—A Most Valuable Asset" is the theme of the four-day conclave, which will be climaxed the evening of June 23 with installation of officers, followed by a dance and entertain-

ment. For details, write C. E. Lee, Secretary-Treasurer. P.O. Box 351, Los Angeles 53, Calif.

Hoover Acquires Lencor Mfg.

Hoover Ball & Bearing Co., Ann Arbor, Mich., has purchased the assets of Lencor Mfg. Co., Lenox, Iowa, producer of dry fertilizer spreaders and other agricultural equipment.

Lencor products will supplement Hoover's Tote Systems Division.

Trimmings

Turf Pioneer Dies. WTT learned recently of the death of Professor Lawrence Sumner Dickenson, one of the leading turf authorities in the nation. In 1958, the veteran agronomist retired from the University of Massachusetts in Amherst, where he led research in golf greens and other fine turf for 45 years. He was among the first to establish the abbreviated 10-week seminars in turfgrass management which have been such a boon to turf professionals who haven't the opportunity to get a degree before starting to work. He lived in Amherst all his life.

The Spokane Word. Bill Senske, who runs Chemical Weed and Pest Control in Spokane, Wash., is to be given a word of praise for his latest mailing piece which we just received. Bill's services range from lawn spraying to fertilizing to tree care, with contract mowing thrown in for good measure. His latest brochure features catchy names for his residential service contracts, names no doubt designed to appeal to Mrs. Homeowner. Examples: Ugly-Slug control (twice a season); Lucious-Lawn Service (complete fertilization); Dandy-Lawn Spray (for dandelion, plantain, thistle); and so on. Bill, a pioneer in this industry, keeps moving ahead!

Show Enough! News is out that long-time industry friend and noted researcher Dr. Warren Shaw, who has been leader of weed investigations in the USDA Crops Protection Research Branch, has been named Acting Pesticides Coordinator, Science and Education, in the office of the Secretary of Agriculture.

Ardor for Arbor Day. One of the most enthusiastic undertakings in the hundreds of Arbor Day projects which went on around the country this spring was the countywide plant-a-tree program held in New City, N. Y. For the third consecutive year, all fourth graders in Rockland County's public school received sugar maple seedling trees to plant in their own yards (trees were donated by the county's 10 Rotary Clubs). We learned of the project through cosponsor Rockland County Extension Service, where county agent Paul A. Lutz has worked happily with this endeavor for three years. To date, 14,000 trees have been planted!

Colburn Cops Commendation. Every year on Foresters Day at the University of Minnesota in St. Paul, an Outstanding Achievement Award is presented by the Forestry Club on campus to the Minnesotan who's made the most significant contribution to forestry during the year. Proud recipient of the prize this year is Floyd C. Colburn, Itasca County extension forester who graduated from the U. of Minn. in 1934. He's been with the Extension Service since 1947, and has also received the Superior Service Award from the USDA. We join with industry men in the land of 10,000 lakes in congratulations!

New DIALOAM

Soil Conditioner Absorbs 150% of its weight in water, provides controlled release of moisture, won't compact.

At last here's a soil conditioner/mulch/top dressing that ends turf moisture problems. Won't cake, won't leach away. DIALOAM is a granulated, diatomaceous earth composed of millions of microscopic water-life plants and fossils. DIALOAM absorbs up to 150% of its weight in water. Moisture release is gradual, just right for healthy grass . . . a life-saver in dry weather. Particles tend to work into the earth giving it a porous, loamy texture that leads to strong, healthy turf. Try DIALOAM on your turf this year! Write for more information.

Weed-choked pond?

FIGHT BACK! WITH ORTHO®

In just ten days, new ORTHO Diquat can give you a clean, weed-free pond

New Diquat makes short work of the common water weeds—water lettuce, water fern, pondweed, coontail, Southern Naiad, water hyacinth and Elodea. Diquat is easily applied by spraying or injection under the water surface. The weeds absorb it, and quickly wilt, collapse and die. (For free-floating weeds, use a standard sprayer.)

Diquat is non-hazardous, used as directed. It would take 20 times the maximum recommended dosage to be at all harmful to fish. It's inactivated immediately on contact with soil, and it doesn't build up in water. In just 10 days (be sure to follow label directions), you can have clear, clean water for irrigation, watering your animals, swimming, or even a fishing hole.
