# MEET THE NEW KWIK KUT®

## CIRCULAR SAW

Light-Weight, Electric and Air Models Now Available.

The fastest pruner ever devised. The only power saw line to offer electrically powered operation. Now—New—heavy cutting E-2 insulated or aluminum shafts—lighter cuts E-1 insulated or aluminum shaft—air-operated insulated or aluminum shaft. Use for shade tree, ornamental, hedging and brush cleaning. They usually pay for themselves on the first major job.

### CUT AT 10,000 RPM

Top, trim, prune and hedge faster and more precisely at a 10,000 rpm cutting speed—twice as fast as by any other mechanical saw! Suckers, branches and small limbs are "flicked off" at a touch of the blade, leaving no scuffed bark, coat hangers, bruised or crushed wood.

### SAVE UP TO 50% OF COSTS

The average man can prune 12' to 14' overhead with ease—ALL DAY—safely from the ground, or from basket or lift. Anyone can use a "KWIK KUT" and equal the work of 3 good men on ladders. Heavy duty models available for citrus and other hardwood pruning.

Write for Bulletin No. 64 today.  
Dealer inquiries invited.

# No Other Chipper Has ALL These FITCHBURG FEATURES

♥ Look inside a Fitchburg Chipper—note its heart—the spring-activated feed plate. No other chipper has this patented feature that adjusts to the size of the wood up to the machine's rated capacity. Chipping is smoother, quieter, faster, permitting the chipping of larger size wood without the need for extra power or the cost of extra fuel.

The spring-activated feed plate also makes a fly wheel unnecessary. No waiting for the fly wheel to speed up—less worries about safety, bearing troubles—and clutch strain. We invite you to compare the ease, economy and efficiency of operation of a Fitchburg Chipper with any other chipper on the market.

### Also Compare These Other Fitchburg Features...

its rugged construction—safety stop switch—large hinged waist-high feed apron—solenoid switch\*—and patented, quick opening two-way chute.\*

Investigate before you buy. Remember, Fitchburg's many exclusive features. For brochure, write Dept. WTT-126.

## Why do staggered knives chip tree trimmings better?

Why do you get them only on  
Mitts and Merrill brush chippers?

Smoother, more economical operation that is easier on the chipper's internal mechanisms are the solid reasons for staggered knife superiority.

Look—most brush chippers use four knives that run the full length of the cutting cylinder. They are spaced around the cylinder at four equal intervals.

M & M, however, divides the same knife length up into 16 smaller knives, spaced only inches apart around the cylinder. Full length knives take only four cuts each time the cylinder revolves. The staggered knives take 16 cuts per revolution.

This faster cutting action draws the log in smoothly and distributes

cutting shock four times more evenly throughout each cylinder revolution. Machine vibration is virtually eliminated; there is less shock per bite; horsepower is used more efficiently; and a lot of fuel is saved.

Knife changing is quicker and easier on M & M design too, because we use a foolproof pin and wedge-lock principle. Knife sharpening is a snap because no angle grinding is required and the double edged knife can be sharpened many times before it needs replacing.

Why can you get staggered knives only on M & M chippers? Because M & M has been the design leader of wood reduction equipment for over 70 years.

more and more from m & m  
**mitts & merrill**

SEYMOUR SMITH & SON, INC.

## PRUNERS and LOPPING SHEARS

SNAP-CUT No. 1149 \$7.95

New, light weight, heavy duty anvil type lopping shears. Alloy metal handles. 100% guaranteed. Cuts limbs up to 1 1/4" diameter.

SNAP-CUT No. 19 \$3.49

The original anvil type pruner. A terrific tool. Cuts up to 3/4" branches. All parts replaceable.

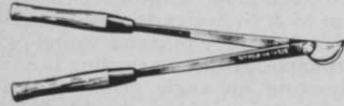

### "ALL PURPOSE" TREE PRUNER (No. 3)

An easy pull cuts 1" branches, spring opens blade for next cut. Lever action. Tempered cutlery steel blade. Heat treated steel head riveted to pole.

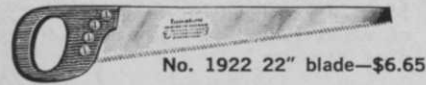

- 6 foot ..... \$5.50
- 8 foot ..... \$6.25
- 10 foot ..... \$6.75
- 12 foot ..... \$7.25

### TIFFANY LOPPING SHEARS No. 528 — \$9.50

Double cut "drawn in" cutting action. All forged, improved bolt and nut joint. Through tang handles.

### NEW, FINEST EVER PRUNING SAWS

No. 1922 22" blade—\$6.65

Fastest, easiest cutting saws for orchard use. Swedish steel blades. Complete line of 6 models covering all requirements up to chain saw work.

# Garber

## broadcasting equipment to handle any job!

**Garber 3 and 5 foot Seeder — Fertilizer Spreaders** can be used with any small farm tractor or any garden tractor (rider or non-rider). The application guide on the back of the hopper gives exact control over the seeding or spreading rate—and triangular shaped openings on 1" spacing assure uniform, blanket distribution regardless

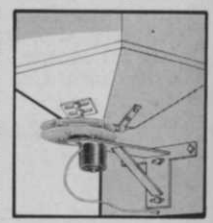

of application rate or type of material. The control handle is easy to reach from tractor or hopper and is not subject to friction or linkage variations in opening and closing. The entire unit is designed so gate and agitator can be easily removed for cleaning. 3' model holds 180 lbs. of fertilizer—5' model holds 300 lbs.

**Garber PTO and Electric Seeders** are made in 26 qt., 3 and 5 bushel models, fit all tractors, go on and off in minutes. They assure wide, even distribution — cover 10 to 25 acres per hour—and have a positive, easy-to-reach control. Electric

models have 6 or 12 volt motor, operate off the battery, and can be mounted on front or rear of tractor, truck or jeep.

**Garber Electric Chemical Broadcasters** are made in 26 qt., 3 and 5 bushel models with either 6 or 12 volt motor—and are designed to handle all types of dry, granular chemicals. A specially designed twin disc, ball bearing aluminum fan assures wide, even distribution. Metering panel permits adjustment of pattern placement while unit is operating. Two interchangeable rubber drive rings let you broadcast over 10' to 15' or 15' to 20' swath. Is ideal for water weed control and other specialized applications.

# Wheel Pump SPRAYER

It pumps  
as it's  
pushed!

## For Turf Care!

One of the handiest sprayers a professional can own. Ideal for jobs too small or too irregular for power equipment. Sprays either a 48" wide or 24" wide swath. Unique rubber wheel-pump "milks" out solution as you push the sprayer. Lays down a heavy residual spray. For killing weeds. Fungus control. Insect control. Turf grubs. Fertilizes, too. Safe. Sure.

**FINLAND TURF CUT**  
DIVISION OF FINNEYFROCK'S-OLNEY, MD.

**Tailor-Made for  
Production Sod Cutting**

THE FINLAND TURF CUTTER offers a new concept in turf marketing. Combining the oscillating blade of the small cutters with the dry ground advantages of the old style drag cutter. This turf cutter will fit any popular 3 point hitch system. It is especially designed for tractors with large flotation tires. Even with changing soil conditions—spring turf to rocks and dry ground—this cutter keeps going with a minimum of replacement parts and a faster, cleaner cut. It only follows that the Finland Turf Cutter means increased profits for you.

Division of Finneyfrock's, Olney, Maryland
