

## Ho-hum... another new herbicide...

This one is called Phytar 560!  
You'd think that manufacturers would run out of funny names . . . or would get wise to the fact that farmers are completely confused about all the new herbicides kicking around these days.

But we think you'll remember PHYTAR! It does things that none of the others have been able to do. It's a general, non-selective herbicide that completely eradicates all vegetation along roadways and ditches, around buildings and storage areas and in other non-crop areas. If you've been using weed oil to

do these jobs you'll find PHYTAR vastly superior in at least five important ways: (1) It's more effective and *cheaper*; (2) There is absolutely no residual toxicity, (3) no staining, and (4) not nearly as much corrosion of your spraying equipment. (5) You'll eliminate the storage problem because one gallon of PHYTAR 560 (which is mixed with water when you're ready to apply it) is equivalent to 50 gallons of weed oil.

Try it! The name's PHYTAR . . . and it's a product of the Ansul Company, Marinette, Wisconsin.
