

# What is there to weed control besides just killing weeds?

Maybe the area to be treated is already weed-free. Or maybe it's infested with established weeds. Perhaps the weeds are annuals. Or deep-rooted perennials that ordinarily are more difficult to control.

Could be the area is large. Or small. It may be easily accessible. Or it might be difficult to reach, either with sprays or big equipment.

These, as well as moisture availability and soil type, are just some of the conditions you have to consider before selecting a herbicide.

But whatever the weed problem, you'll find the right answer in one of the five Geigy industrial herbicides. Why? With them, you can solve just about any weed problem you might encounter.

What's more, each Geigy industrial herbicide delivers long-lasting residual control with once-a-year application. So they're most economical, too.

Geigy herbicides are easy to handle and apply. They require no special protective clothing or devices and can be applied through most application equipment.

For spraying, you can use Atrazine 80W or Simazine 80W wettable powders, or Pramitol® 25E emulsifiable solution. Where spraying is impractical, you can apply dry Pramitol® 5P or Atritol™ 8P pellets, by hand or mechanical means.

Find out more on how these Geigy industrial herbicides can solve practically all your weed problems . . . effectively and economically.

Be sure to write us today for fully descriptive literature.
