# Give crabgrass

One  
week

Two  
weeks

Four  
weeks

(Like 2 feet in 10 weeks.  
It'll also produce 3,000 seeds  
to grow on you next time.  
Balan™ nips all this in the bud.)

# a chance and it'll grow on you.

Six weeks

Ten weeks

One of  
Elanco's  
dependable  
weed-control  
crew

Untreated, there'll be a bigger crop next time, make no mistake. With your fertilizing and watering, crabgrass plants become fully-equipped seed factories in ten weeks.

**Balan puts crabgrass out of business.** Other annual weedgrasses, as well. A waterproof, pre-emergence weed killer, Balan forms its protective zone where seeds germinate. Kills 'em for months, despite heavy rains and irrigations.

**Works economically even on big areas.** Costs \$15-30 an acre. (Certain warm-season areas require two appli-

cations at a heavier rate for year-around control.)

**Gives a big margin of safety**—when used as directed. Big convenience, too—granules are easily applied with your equipment. Make Balan's crabgrass control a key step in your lawn-care. See your turf supply and equipment distributor now. Or contact us for the name of the distributor nearest you.
