Independent laboratory tests prove WILT PRUF 40 to 50 times more effective in stopping excess water-loss than any substitutes. You can have test details on request. Better still, you can try WILT PRUF yourself as a preventive against transplant shock, winter kill, summer scald, city air pollution. You'll find it's a real life saver. There is no second choice! Write on your letter-head for informative free literature.

Big Sipper

Here's a suction strainer that's all sip and no spit—just what you need when you're filling your spray tank from pond or stream. And it's just what you need to comply with recent pollution control laws.

Big Sipper sucks up more water per minute for more efficient spraying. Yet there's no danger that chemicals will siphon back into your water source. A corrosion-free neoprene ball instantly seals off any possible siphoning at shut-down. It works far more assuredly than an easily-jammed gate valve or a sluggish, corrosion-prone metal ball.

The Big Sipper is a lightweight casting, so there's less danger it'll sink into the muddy bottom. And the strainer is recessed to assure free water passage.

Get all the facts about the Big Sipper. Write for our free spray hose coupling and accessory catalog.
