

No-drift WILSCO FoamSpray puts herbicides and pesticides in their place.

Wilco FoamSpray is an improved surfactant additive that reduces drifting in herbicide/pesticide spraying. A little bit (1/2 gal. per 100 gal. of spray) goes a long way in eliminating pollution.

The same FoamSpray action that puts herbicides or pesticides directly on your crop provides better coverage. Reduces evaporation. Cuts labor and material costs. And visibly indicates sprayed areas.

FoamSpray's active ingredients reduce surface tension on the leaves of tender plants. Without the burning tendency common to many other "surfactant soaps."

It can be used with conventional sprayers capable of 40 to 600 psi pressure. And easy-to-install foam activator attachments are available for all types of spraying.

Wilco FoamSpray is economical for all applications on crops, along railroad and highway right-of-ways, around tank farms and commercial properties, and in orchards.
