QUALITY, Performance, Dependability...

COLT.
One word.
You know it.
Quality, performance,
dependability
are all there.

JACKLIN.
One word.
Same story.
Jacklin Seed
Company
is one of the world's largest
producers of bluegrass and
other grasses, a name synony-
mous with quality, perform-
ance and dependability.
When ordering seeds, specify
JACKLIN SEED.

JACKLIN PRODUCES:
Merion Kentucky bluegrass
0217® Brand Fylking
Kentucky bluegrass
Nugget Kentucky bluegrass
S-21 Kentucky bluegrass
Newport Kentucky bluegrass
Delta Kentucky bluegrass
Geary Kentucky bluegrass
Park Kentucky bluegrass
Six Kentucky bluegrass
Troy Kentucky bluegrass
Norlea Perennial ryegrass
Public and private varieties of
Creeping Red, Chewings & Hard fescues.
And has produced on a contract basis:
Pennfine Perennial ryegrass
N.K. 100 Perennial ryegrass
N.K. 200 Perennial ryegrass
Pelo Perennial ryegrass
For these quality Jacklin seeds see your
local wholesale seed distributor. Jacklin is
also a prime* contract producer of:
Warren's A-34 Kentucky bluegrass
O.M. Scott's Windsor Kentucky bluegrass
Adelphi Kentucky bluegrass

Jacklin has built a reputation for fine
quality and service over 30 years. You
can count on purity of content, high
quality and sure germination.

*Available only through breeder and owner outlets.

Clearspray, anti-transpirant

We are a real aid to your golfer and cart management problems!

Dear Superintendent:

The advent of golf carts has provided golf clubs with income, and replaced hard-to-find caddies.

However, carts have also created problems for you, the course superintendent. We know that carts, improperly used, cause compaction, ruts, and grass-less paths.

We also know that about half the operators of carts do not understand compaction, nor do they pay

attention to where they drive their carts. Cart management is a problem at most golf courses. Recognizing cart problems, COURSIGNS was established and is manufacturing plastic signs and stakes that will help you in your cart management.

The signs are inexpensive, yet proven effective. They will not cause mower damage, and are designed to minimize labor in installations, by providing a "wedge-type" rope notch to facilitate stringing of ropes between stakes. A variety of inscriptions are

available which not only cover direction of carts, but define "ground under repair" areas, remind golfers to replace divots, rake traps, etc. May we send you free samples for your evaluation?

Yours truly,

COURSIGNS, INC.

6500 N. CLARK ST. • CHICAGO, ILLINOIS 60626
(312) 465-6330

All our signs measure 2-9/16" x 8-1/8"

PATENT PENDING

FEB. 1973

Forget about the bother of having metal signs made, nailing them to stakes, plus the nightmare of them getting stuck in the course mowing machines.

Assembly of our signs is a simple self-locking device as the illustration shows. Also a tube of plastic cement for permanence, if so desired. Stakes may be used with one or two signs, or alone to rope off any given area.

Signs are black lettering on yellow, except HAZARD sign which is yellow lettering on red, for lateral hazard; also black on yellow for parallel hazard.

WRITE FOR FREE SAMPLES

PRICE LIST

12" stakes \$30.00 per hundred
14" stakes \$34.00 per hundred
Signs \$40.00 per hundred
(Choice of any mix of inscriptions)

Rope \$25.00 per thousand ft.
(3/16" polypropylene—yellow)

Minimum order \$ 50.00

Special Starter Kit Offer \$129.50

Includes:

250 each 12" stakes
100 signs of your choice
2,000 ft. rope

Note: Terms 1% 10 days F.O.B.

CLEARY PRODUCTS for BETTER TURF

3336 TURF FUNGICIDE — A broad spectrum systemic fungicide that prevents and controls all 6 major turf diseases. Non-toxic, non-mercurial.
BROMOSAN TURF FUNGICIDE — The newest broad spectrum systemic fungicide for those persistent problem areas or areas that have gotten out of hand.
CADDY — Economical Liquid Cadmium Fungicide.
PMAS (10%) — Crabgrass and Disease Control.
SPOTRETE — 75% Thiram Fungicide.
CLEARY'S GRANULAR TURF FUNGICIDE — For snow-mold, spring and summer diseases.
CAD-TRETE — Broad spectrum fungicide containing Thiram and Cadmium.
MCCP — Control of chickweed, knotweed, clover on bentgrass greens and fairways, bluegrass and fescues.
MCCP-2,4-D — Controls chickweed, knotweed, dock, dandelion, plantain, ragweed, pigweed, etc.
METHAR 80 — Controls Dallisgrass and crabgrass. Water soluble.
METHAR 30 — A super crabgrass killer.
AMA PLUS 2,4-D — Control of Dallisgrass, silver crabgrass, plantain, dandelion, knotweed, chickweed, and other broad-leaf weeds.
AMA (SUPER METHAR) — The new "AMA" liquid crabgrass killer.
ALL-WET — Added to water, it allows quicker and deeper penetration...enables soil to retain needed moisture.
CLEAR-SPRAY — Liquid Hygrostatic Sticker to protect against wilt and winter kill.
TRU-GREEN — Liquid Chelating agent.
GRASS-GREENZIT — Permanent green pigment, restores green color to dormant or discolored grass. Not a dye.

(continued on page RR)

A common sprinkling can is the only tool needed to apply Diagnostic Aid. The pyrethrin compound is packaged in two-ounce containers, for use at 1/2 to 1 capful per gallon of water.

The mixture is applied to one square yard of turf or lawn. Applications should be made on two or three similar areas per 5,000 square feet of turf. Sensitive insects emerge within 10 minutes after application.

DIAGNOSTIC AID FOR TURF

Clever New Irritant Aids In Pest Analysis

A NEW development in turf insect control makes it possible to tailor control measures toward the particular insect species present.

Diagnostic Aid, recently introduced by Tuco, Division of the Upjohn Company, received Environmental Protection Agency approval for use as an aid in detecting insects earlier this year. Not an insecticide, but an irritant, application of the chemical causes sensitive species of insects to emerge from the soil.

"This before and after treatment of Diagnostic Aid should greatly reduce the need for wholesale application of everything in the spraying arsenal just to make sure all possible pests are killed," says Dr. Price Parham, a Tuco researcher. "A new era of programmed turf is now practical."

The ultimate results of such a program should be more economical insect control, fewer total insecticides applied, and less potential risk to the environment.

For more details, circle (719) on the reply card.

Larvae of cutworms and sod webworms respond almost immediately to the treatment, Tuco researchers say, and earthworms can also be detected. After learning exactly what insect species are present, the turf manager can determine whether control measures are justified and, if so, what measures to use.

Tuco's Proxol 80SP trichlorfon insecticide is sold in conjunction with Diagnostic Aid for use if more than one cutworm or sod webworm larvae are detected per square yard of turf. After the use of Proxol, an application of Diagnostic Aid will enable the user to assess the results of the insecticide.

We'll put our weed control crew

up against yours any day!

Would your crew promise (and deliver!) effective control of many weeds for as little as ten cents per thousand square feet?

Would they promise not to damage or weaken any growing stock they are cleared to handle?

Would they keep on working around the clock, month after month?

If not, turn the weed control job over to our crew. You couldn't ask for better, more dependable help!

Bet you can't name another insecticide that kills as many bugs as Zectran. That's because there's nothing quite like ZECTRAN* insecticide. It's the powerful, general use product that may replace other insecticides you're now using. ZECTRAN insecticide works on almost all major foliage-feeding insects—including hard-to-kill kinds, foliage-feeding worms and caterpillars, even many major turf pests. And more. ZECTRAN insecticide is also effective against slugs and snails. Use ZECTRAN on over 600 different flowers, ground covers, trees, shrubs, house plants and turf. It's biodegradable, easy to apply—in either liquid or powder form. Just remember to read and follow all the directions for use and precautions for safe handling on the product label.

Get the tops in shade tree spraying

John Bean ROTOMIST sprayers have the power to put protection where it's needed most—in the tops of the trees. Straight-through air delivery, unrestricted by elbows, angled air passages or deflectors, breaks up droplets for uniform deposit of chemicals and carries them throughout the tree for full coverage, economically and fast. □ ROTOMIST sprayers are available in

four basic models for all kinds of spraying jobs from trees and shrubs to mosquito and fly control, weed and brush spraying, windrowing leaves, spraying livestock, zoos and other areas where pesticides are needed. Find out how to save from 50 to 75% on equipment and labor with multi-purpose ROTOMIST. Ask your John Bean dealer now.
