

# baron

U.S. Plant Patent No. 3186, Dwarf Variety

## the aristocrat of Kentucky bluegrasses

**STRONG ROOT GROWTH** is the secret of **baron's** dense turf. It is the extremely rhizomatous nature of **baron** Kentucky Bluegrass that is making it the favorite of the turf production industry. It rapidly forms a dense turf which is lifted and transported easily without damage. *In the Midwest, **baron** sod has been lifted 10 months after planting.*

**QUICK ESTABLISHMENT** is another important characteristic of **baron**. This laboratory photo shows a germination test on **baron** (right), as compared with Merion, just two weeks after sowing. In the soil, the difference is even greater.

**baron** is available as sod from leading sod growers across the country.

For details (and the name of your nearest **baron** distributor or sod grower) on this fast-germinating, slow-growing, disease-resistant, winter-hardy bluegrass for golf courses, fine lawns, commercial locations, and sod production, write or call Lofts.
