

"In a matter of minutes, a completely untrained person can fertilize with Jobe's Spikes."

Charles Wollett, Manager, Sylvan Abbey Memorial Park, Clearwater, Florida

"A crew of 22 people takes care of more than 5,000 trees and shrubs at Sylvan Abbey. We have live oak, many species of holly, a few palm, some pine and jack oaks, azaleas, Formosas, vibernam and padocarpus. I really like how easy it is to use Jobe's Spikes. We're pleased with them."

In every type of climate and every kind of soil from sand to heavy clay, Jobe's Spikes have proved their effectiveness.

Jobe's Spikes are faster than drilling, better than broadcast fertilizer.

Use Jobe's® Tree and Shrub Spikes, and you feed trees in about one fourth the time and half the cost of drilling. A 5" tree takes about 5 minutes labor, plus \$1.50 for 5 Spikes. Compare that to 30 minutes labor to drill holes, plus the time and cost to apply 10 pounds of fertilizer.

Jobe's Spikes are better than broadcast fertilizer because the plant food gets to the tree roots without danger of run-off, burned turf or excessive leaching.

A plastic cap makes driving the Spikes easier. Just pound them into moist soil at the drip-line at the rate of 1 per inch of trunk diameter.

With Jobe's there's no bulky auger and generator to carry from job to job... no electric wires to tangle... no equipment to eat into profits with maintenance costs. A hammer is all the equipment you need.

Jobe's Spikes baby young trees.

"We lose probably from 12 to 24 trees per year to lightning or disease.

These are generally older trees, and we always replace them. We use Jobe's

Spikes with these new plantings to help them survive the shock of transplanting and develop a good root system."

Easy, economical, and effective.

University leaching studies have shown that Jobe's Spikes are as effective as fertilizer supplied to trees by conventional drilling methods. The report on the studies states, "The spike will supply nitrogen and potassium to a depth of at least 24 inches. The spike permits the movement of nutrients down through the tree root zone from the surface to the major root areas." Let us know if you'd like a copy of the complete report.

Charles Wollett is saving time and making money with Jobe's.

How about you?

Jobe's Evergreen Spikes 12-6-8 and Fruit Tree Spikes 5-15-15 are now available in bulk. They can be combined for shipping with Tree and Shrub Spikes.

Call your local Jobe's distributor or order direct. \$30 per case (105 Spikes) prepaid, 5 case minimum. 15 or more cases, \$25 per case. 36 or more cases, \$21 per case.

Jobe's® TREE & SHRUB SPIKES

The easy method for professional tree care. International Spike, Inc., 462 East High St. Lexington, Kentucky 40508.

Just pound them in... rainwater does the rest.

Jobe's Spikes are a pre-measured amount of fertilizer formed into easy-to-drive spikes by means of a patented binder. Jobe's Tree and Shrub Spikes are 16-8-8. Evergreen Spikes are 12-6-8. Fruit Tree Spikes are 5-15-15.

THE 44-INSECT INSECTICIDE.

For trees, ornamentals, and turf.

One solution versus 44 problems. Those are pretty good odds.

Especially since you can't always be sure which insects will threaten the valuable trees, turf and ornamentals you protect. And people enjoy.

This broad-spectrum control with SEVIN® carbaryl insecticide takes some of the chance out of your job.

Its versatility also lets you cut down on

STOP! ALL PESTICIDES CAN BE HARMFUL TO HEALTH AND THE ENVIRONMENT IF MISUSED. READ THE LABEL CAREFULLY AND USE ONLY AS DIRECTED.

the need for a large chemical inventory.

Why use an array of different brands with different instructions, if you can do the job effectively with a single product? You'll enjoy less nozzle changing, chemical switching and tank flushing. All good reasons to rely on dependable SEVIN.

Use it in any of its available forms to suit your needs. Choose from wettable powders, flowables and liquid SEVIMOL® 4.

And many SEVIN formulations are compatible with most commonly used fungicides, miticides and other insecticides.

With the increased awareness and concern for protecting the environment, it's nice to know that SEVIN carbaryl is biodegradable. It does not build up in the soil or in plant and animal tissue.

Also, when compared with many other insecticides, SEVIN ranks low in toxicity to people, animals, birds and fish.

There's another advantage to using SEVIN in parks, golf courses and other recreational areas—even home yards and gardens. Short re-entry time. Treated areas can be re-entered as soon as the spray dries or dust settles.

PLANTS	INSECTS CONTROLLED
HERBACEOUS ANNUAL, BIENNIAL AND PERENNIAL PLANTS such as carnation, chrysanthemum, gladiolus, iris, peony, zinnia, etc.	blister beetles, boxelder bug, flea beetles, Japanese beetle, June beetles, lace bugs, leafhoppers, leafrollers, mealy bugs, plant bugs, psyllids, rose aphid, thrips (exposed).
SHRUBS, TREES AND WOODY PLANTS such as ash, arborvitae, azalea, barberry, beech, birch, boxwood, catalpa, cedar, cypress, dogwood, elm, euonymus, fir, ginkgo, hackberry, hawthorn, holly, honeysuckle, hydrangea, juniper, lilac, magnolia, maple, oak, pine, redbud, rose, spruce, sycamore, tulip-tree, etc.	apple aphid, bagworms, birch leaf miner, boxelder bug, boxwood leaf miner, cankerworms, catalpa sphinx, Cooley spruce gall aphid, Eastern spruce gall aphid, elm leaf aphid, elm leaf beetle, elm spanworm, eriophyd mites, gypsy moth, Japanese beetle, June beetles, lace bugs, leafhoppers, leafrollers, mealy bugs, mimosa webworm, oak leaf miner, orange striped oakworm, orange tortrix, periodical cicada, plant bugs, puss caterpillar, rose aphid, roseslug, saw flies (exposed), scale insects, spruce needle miner, tent caterpillars, thorn bug, thrips (exposed), webworms, willow leaf beetles, yellow poplar weevil.
LAWNS, TURF	ants, bluegrass billbug, chiggers, chinch bugs, cutworms, earwigs, European chaffer, fall armyworm, fleas, green June beetle, leafhoppers, millipedes, mosquitoes, sod webworm (lawn moths), ticks.

NOTE: SEVIN will injure Boston Ivy, Virginia Creeper, and Maidenhair fern.

Make a quick check of the plants and insects for which SEVIN carbaryl is registered. See how many problems it can solve for you. In all there are over 160 pests on more than 100 plants. This broad registration minimizes the problem of drift to adjacent areas.

This year, ask your pesticide supplier for SEVIN carbaryl—the insecticide with a proven performance record in fighting plant pests.

SEVIN®
CARBARYL INSECTICIDE
STILL THE ANSWER.

TOUCHDOWN

...this Elite starts FAST.

Touchdown Kentucky Bluegrass is no slow poke on your fields or fairways. This new variety gives you the quick start not usually associated with Elites—and once it germinates it keeps right on growing sending out vigorous rhizomes and new shoots to quickly give you a turf cover that lets you breathe easy. Faster cover means fewer washouts and blowouts, less competition from moisture and nutrient robbing weeds and a more quickly established turf for sale as sod or play on fairways. Touchdown can be mowed short and its density means you can plant it right up on tees too. You'd expect this with Touchdown's pedigree.

Touchdown was discovered by a professional—Tom Rewinski—Course Superintendent at the famed National Golf Links of America on Long Island. It was first evaluated by Dr. C. R. Funk at the turf grass breeding program at internationally acclaimed Rutgers University. Since Rewinski's discovery, intensive evaluation there and at numerous other institutions Touchdown has received top turf quality ratings.

And it only stands to reason that Touchdown will be a lower cost management grass. More rhizomes and side shoots means growth is directed where you want it—not just mow, mow, mow. Greater levels of disease resistance means fewer costly fungicides and dense aggressive turf means better competition against weeds and Poa annua.

Professional Quality Seed of Certified Touchdown Kentucky Bluegrass is now available.

To find out how great Touchdown is—contact your distributor and try some.

Princep works around ornamentals.

Princep® herbicide stays where you put it. And since it has practically no foliar action, there's little danger to the plants you spray around.

Princep cleans up your right-of-way and won't hurt your ornamental plantings. It's as simple as that.

What about control? One application of Princep controls most annual grasses and broadleaf weeds.

For a full season.

No other herbicide can give you

broad spectrum weed control. Without posing a problem for ornamentals.

This season, talk to your local Princep dealer. Go over the correct rates and the newly expanded list of labelled trees and shrubs, before you spray.

Or, if you'd like, drop us a line. We'll send you our fact sheet.

Agricultural Division, CIBA-GEIGY Corporation, P.O. Box 11422, Greensboro, NC 27409

CIBA-GEIGY

Products

The Gravelly division of the Clarke Gravelly Corp. is marketing a new 30" rotary mower with re-designed fenders for even, fast grass discharging, added front roller to prevent lawn scalping and for lifting the fenders over obstacles and uneven terrain. The rear discharge design provides superior trimming ability to within a half-inch of obstacles.

Circle 701 on free information card

Sto-Cote Products is introducing a high density, cross-laminated, poly-sheeting sand trap liner which separates sand and soil in golf course sand traps, broad jump pits and children's sand boxes. Marketed as STPL, the liner keeps weeds and roots from growing through into sand areas. Perforations allow necessary drainage, minimizing surface puddling.

Circle 702 on free information card

A new liquid injector attachment capable of injecting nematicides up to three inches deep through small, hollow tines, will be introduced this spring by Ryan. The new attachment is powered by Ryan's Greensaire 11 aerator and connects to any pressurized (150-400 psi) spray tank. The attachment can be installed in approximately 30 minutes. The new attachment can treat up to 8,000 sq. ft. per hour.

Circle 703 on free information card

A new 30 gallon sprayer for Economy Power King and Jim Dandy model tractors will handle liquids, water-soluble chemicals or wettable powders. The sprayer can

be used for fertilizer applications or for spraying insects, weeds, trees or bushes. The unit is equipped with a 100 lb. pump, a pressure gauge, suction strainer, shut-off and relief valves, a tree spray nozzle and a spray boom with four nozzles that can be mounted on front or rear of the tractor.

Circle 704 on free information card

Five Star Engineering has developed a heavy-duty industrial auger digger. The Five Star Digger is sold under a three year warranty and fits all tractors with Cat. 1 & 11 3-pt. hitches. Bevel gear is machined and hardened and Woodruff keyed to the output shaft with a reduction of 3.18 to 1. Pinion is one piece with splined input shaft, machined, hardened and straddle mounted between two tapered roller bearings.

Circle 705 on free information card

New from Dedoes, the TCA-550 Two-Drum Aerator tines on approx. 2" centers. Makes a neat, clean hole pattern, 25 inches wide, aerates 5,000 sq. ft. green in less than 15 minutes and leaves it in playable condition. Three pivoting tine sizes: 1/2", 3/8" and 3/4".

FYLKING IS A SHOO-IN!

0217® brand Fylking Kentucky bluegrass, the famous Swedish beauty, stands out because of its many improved qualities. An outstanding feature is fast germination, rapid growth that makes sod lifting possible sooner than other varieties. Superior density of rhizomes and root system makes an almost impenetrable sod that helps strangle weeds, prevents invasion.

Purity is a prerequisite. Fylking Kentucky bluegrass contains no annual bluegrass (*Poa annua*), bentgrass or short-awned foxtail. Fylking is your guarantee of physically pure, genetically true seed.

Fylking Kentucky bluegrass seed costs less than most other elite bluegrasses.

Fine-textured, brilliant green turf from early spring to late fall, Fylking is more drought, disease, traffic, heat, cold and smog resistant.

Low-growing, low-mowing characteristics result in fine professional golf tees and home putting greens; can be mowed low as 1/2-inch.

0217® brand Fylking Kentucky bluegrass is a shoo-in for first choice in any lawn seed mix. Specify the Swedish beauty, Fylking, at your local wholesale seed or sod distributor.

FYLKING KENTUCKY BLUEGRASS

U.S. Plant Patent 2887

Another fine, quality-controlled product of Jacklin Seed Company.

Fylking produces multiple branch rhizome and root systems and an abundance of leaf tillers growing more parallel to the ground.

Don't let insects
make your turf a jungle.

DURSBAN

For less money than any other major turf insecticide, DURSBAN* brand insecticides can keep more than a dozen insect pests from turning healthy turf into a teeming insect jungle. Chinch bugs, sod webworms, you name it. If it's a major turf insect problem, DURSBAN 2E or more concentrated DURSBAN 4E probably controls it. Economically. Just one application of either product provides several weeks of effective residual insect control. Simply mix with water and spray.

Or call one of our selected custom formulators, and apply a DURSBAN granular formulation straight or in a dry fertilizer mixture. Life is a big enough jungle without insects tearing up your turf. So for broad-spectrum insect pest control at a very low cost, make DURSBAN insecticides part of your turf program. Just read and follow all label directions and precautions. Agricultural Products Department, Midland, Michigan 48640.

The New Yorkers Who Hustle the Wind.

Street life in a metropolitan area often inspires genius. And that genius can be funneled two ways—good or bad.

The 11th Street Movement in Manhattan's Lower East Side has funneled their genius on the good side with a unique energy saving project involving windmills and solar panels.

This project is just part of the Emergency Energy Conservation Program operated by the Community Services Administration. CSA has established many demonstration programs designed to find new and better ways to help the poor and elderly cope with what for them is a continuing energy crisis.

The program has a broad base, covering everything from development of low cost solar heating and wind generators to experiments with energy conserving farming technologies.

But helping people help themselves isn't an easy task. Simply put, it demands community support—Your support and the support of local and state governments.

If you think this effort is worthwhile, take action, contact your local Community Action Agency or Community Services Administration Washington, D.C. 20506.

There are thousands of people who want to help themselves. Like the 11th Street Movement—they learned how to catch the wind, so they'll no longer be a victim of the elements.
