

CIL Sulphur Coated Urea

The Number One Controlled Release Nitrogen Fertilizer

1975 research plots at the University of Guelph, Canada, where Sulphur Coated Urea was tested against other nitrogen fertilizers, including two commonly recognized as slow release nitrogen fertilizers. CIL Sulphur Coated Urea treated grass in foreground.

**Efficient
Effective
Economical**

Efficient

- Release of nitrogen is controlled by moisture. Temperature and bacterial activity are not important factors. Excess moisture however, **does not** markedly speed up the release of the nitrogen.
- Soil pH does not alter pattern of release.

Background photo:
CIL Sulphur Coated Urea prills
actual size.

Effective

- Tested on grass plots under scientifically controlled conditions, CIL Sulphur Coated Urea outperformed all conventional slow release nitrogen fertilizers tested, in both the appearance and growth of grass obtained.
- CIL Sulphur Coated Urea releases nutrients as soon as it is applied and continues to do so evenly over 4 to 5 months. Result is more complete utilization of nitrogen applied, and no build up of nitrates in the soil.

Economical

- High WIN; low cost per unit of nitrogen compared to other WIN sources.
- Available in bulk or in 44 lb plastic bags.

Please send me more information about CIL Sulphur Coated Urea.

TORO®

Backflow Preventers

For Cross Connection Control

- ¾", 1", 1½" and 2" sizes.
- Double check and reduced pressure principle models.
- Compact, lightweight, for fast installation.
- Modular construction for easy in-line servicing.
- **Meets performance specifications of AWWA. Approved by USC Foundation for Cross Connection Control. ASSE and IAPMO listed.**

Order from your wholesale plumbing supplier.

How to spend less time lubricating and more time mowing with gang mowers.

It's so easy you'll wonder why all mowers aren't made like Jacobsen makes them.

And that's with a sealed housing design that requires lubrication only once a year. Not every time you use the mowers. Just once a year.

Which is one good reason why you see so many Jacobsen gang mowers out cutting turf instead of being out for lube jobs.

Another reason you see so many Jacobsen gang mowers out there is because we make so many of them. In fact, we offer the world's most complete line.

It includes (and it's quite a list): Fairway gang mowers with your choice of 5, 6 or 10-blade units. In 3, 5, 7, 9 or 11-gang pull behind combinations. With adjustable cutting heights.

Plus Blitzer gang mowers (for rougher turf) with 4 or 5 blade units, and bigger 10" reels. In 3, 5, 7, 9, and 11-gang combinations. With adjustable cutting heights.

And here's another Jacobsen exclusive. For quick parallel alignment of bed knife ends, simply turn two adjustment knobs by hand.

Both Fairway and Blitzer units offer you three different wheel styles. Steel, semi-pneumatic and pneumatic, each in two sizes. Yet another Jacobsen exclusive.

Then, there's our Ram Lift Ranger frame for 3 or 5 gang units. The reels raise and lower hydraulically. And 5, 7 and 9-gang mowing tractors to top it off.

Ask your Jacobsen Distributor for a demonstration. He'll show you a whole line of gang mowers that do more mowing and less getting ready for it than anything you've ever seen.
