Coming Next Month . . .

Grounds maintenance for recreation areas, the effects of slow release nitrogen on turf, the granular application method for lawn care and more.

Doing it, the Klearway. There's no better way!

Nothing clears brush and timber from your right-of-way like the mighty Klearway.

Faster, Better and Saves You Money

A well-maintained right-of-way means quick access, safe working conditions and assures your customers of dependable service. The Klearway enables you to maintain right-of-way

inches in diameter at a rate of four acres per hour. In hilly or marshy areas, or with material averaging six-to-eight inches in diameter, the Klearway's a bit slower—but it's still the one machine that clears almost everything, almost everywhere.

Performance and Power

The Klearway's total mulching capability leaves nothing but a fine carpet of biodegradable chips on your

faster, better and less expensively than any other clearing machine or combination of farm type machinery.

Clears Almost Everything, Almost Everywhere

In routine terrain, the Klearway clears brush and timber averaging four

right-of-way. Caterpillar® power takes you to the tops of the big hills and Terra Tires® won't let you down in the swamps.

Doing it, the Klearway—there's no better way.

Before

After

Nothing clears brush and timber like the mighty Klearway.

This is where Fred Getz found out that the framus is really a reel lapping device.

It's the Jacobsen Turf Care Equipment School at our factory in Racine. And it's the oldest, most complete school of its kind in the United States.

Many users of Jacobsen Turf Care Equipment make it a point to send their service people here. Just to get maintenance training by experts.

It makes a lot of sense because it benefits them in several ways.

First, it enables users (like you) to make more and better repairs right on the spot. It saves sending

the equipment out for many repair jobs because you are better trained to handle a greater variety of service problems.

So it can save costly down time when you need to use the equipment most.

Second, the training in preventive maintenance helps your servicemen do a better job of routine maintenance. Which means that your equipment should last longer and run better.

This adds up to interesting savings in capital expenditures

over the long haul.

Courses offered include basic and advanced hydraulics. Circuitry. Parts. Electrical components. Engines. New equipment. And more.

Besides having the school in Racine, we sponsor field service clinics at locations closer to your operation.

Sound intriguing? For more details, simply contact your local Jacobsen distributor.

He can help you take the framus out of your service problems.
