

AS THE SEASONS CHANGE, SO DOES THE GREENSAVER® AERATOR.

The condition of the soil on any golf course or fine turf area changes throughout the year. And for proper turf management, you need to change the way you aerate.

Now you can, with the Cushman Greensaver aerator. Three interchangeable drums let you pick the type of tines that are right for the soil and the season, while you aerate up to ten times faster than walk-behind aerators.

The Greensaver attaches easily to any Cushman Turf-Truckster chassis equipped with the hydraulic system

and dump set. You travel between areas quickly, raising and lowering the Greensaver without leaving the driver's seat.

The standard ½" coring drum provides maximum soil removal for normal aeration. In the fall, during slow-growth periods, you can use the ¾" coring drum to remove less soil. And for the hot stress periods of summer, you can use the slicing drum.

With the coring drums you can collect the cores as you aerate, or leave them on the turf. Either way you

get an accurate ¾" x 4" pattern of holes up to 2½" deep.

Ask your Cushman Turf dealer to show you a Turf-Truckster® vehicle equipped with the Greensaver aerator. And find out how you can get fast, easy, accurate aeration that changes with the seasons.

Funding the future

Professor H. B. Musser has made an investment in the future. He is the developer of Penncross Bentgrass, Pennlawn Fescue, author of the book *Turfgrass Management*, and a noted educator.

Professor H. B. Musser devoted his career to grass seed research. As a tribute to this outstanding Pennsylvania State University Turf Seed Agronomist, the Musser Foundation was formed.

The foundation's purpose is to assist graduate students in turf research through a fellowship program. This means students who have finished their undergraduate work and are going into turf research may receive financial assistance at this critical point in their careers. Only the interest earned from the H. B. Musser Fund will be used for fellowships, so the dollars you contribute keep on working in perpetuity.

If you or your company are involved in the sale or use of turfgrass or turfgrass-associated products or services, there's no better way to help yourself and the future of the turf industry than an annual contribution to the Musser Foundation.

Contributions may be made in the name of a loved one through the Memorial Fund, or to the Turfgrass Research Fellowship Fund.

"A fellowship involves an exceptional graduate student doing needed research, writing a thesis, adding to turfgrass literature and providing leadership for the future."

THE MUSSER INTERNATIONAL TURFGRASS FOUNDATION

of the H. B. Musser Turfgrass Fellowship, Inc.

Please send contributions in care of:

Dr. Fred V. Grau

P.O. Box AA

College Park, MD 20740

A nonprofit organization dedicated to fostering Turfgrass as a learned profession; to enhancing the lives of people all over the world through Turfgrass, and to supporting education and research in Turfgrass development and management.

Model GTL-140 gas-powered trimmer from Echo, Inc. comes with a flexible plastic blade which the manufacturer claims is easier to use than nylon line yet trims grass and weeds like a steel blade. Its 13.8cc Kioritz engine is on the lower end of the shaft to eliminate the need for an expensive flex shaft.

The forward handle adjusts to fit the operator and maintain correct balance when using the trimmer. The stop switch and throttle are on the pistol-grip, rear handle. Weight of the trimmer is 8.1 pounds.

Dura-Life 350-gallon tank for liquids fits all 1/2-ton and larger pick-up beds, even with the tool box and/or fuel tank still in the bed. Its round shape reduces surges, which can be uncomfortable and dangerous. The Kerrco, Inc. tank holds water, chemical sprays, and fertilizers. It is made of tough linear polyethylene which inhibits sunlight, and weighs 110 pounds.

Circle 107 on free information card

ryegrass the other) has been used successfully. The ryegrass germinated quickly and competed with annual bluegrass but did not compete with the bentgrass once the bentgrass matured. Research to date has indicated that the conversion of a bentgrass-annual bluegrass stand to predominately bentgrass is a more gradual process than converting a Kentucky bluegrass-annual bluegrass mixture to predominately Kentucky bluegrass.

Three consecutive fall applications (usually with overseeding) appear necessary for significant annual bluegrass control. After three years, it must be decided whether to continue application or initiate a preemergence program. Application of preemergence materials, may preclude further fall overseeding and for all practical purposes eliminate fall aerification programs.

Are there drawbacks?

Although the cost of applying MH at 1.5 lbs/A can be justified, this type of annual bluegrass control program requires excellent communication with club officials. Due to the discoloration associated with application of MH (even though it occurs in late fall and winter), it is important that those using the golf course be informed.

Spray equipment must be **precisely calibrated** and functioning properly (new nozzles, proper overlap, etc.). Sloppy applications of MH will be very obvious, particularly when severe discoloration occurs with colder weather.

Fall application of MH on turf-type perennial ryegrasses has caused stand losses over the winter. Therefore, caution should be exercised when treating areas that have been overseeded with perennial ryegrasses.

Initially, use of MH for annual bluegrass control should be tried on a limited scale in combination with overseeding. Observation of the treated area will assist the superintendent in determining the amount of discoloration at his location and the amount of control. Also, any sprayer problems can be identified and corrected before expanding the program. Several golf course superintendents have initiated annual bluegrass control programs with fall applied MH and in almost all cases, they have increased the use of the program. **WTT**

IT ARRIVES WITH THE LOAD, UNLOADS ITSELF THEN UNLOADS THE LOAD!

COMPARE this user proven material handler with other methods of job site unloading and the bottom line will show you that **THERE IS NO BETTER WAY!!**

The SPYDER®

THE SPYDER — A material handler that offers unequalled performance, low maintenance and operating costs. Over 500 are currently being used by SOD producers and allied industries across the U.S.A., Canada and England.

Finally, An Aid For Teaching Turfgrass

Superintendents, Contractors, Lawn Care Managers, New, On-the-Job Reference. The Turf Managers' Handbook is a comprehensive, organized approach to turfgrass science and care. It has been designed and written by leading turf specialists from Purdue, Dr. William Daniel and Dr. Ray Freeborg, for on-the-job reference and as a text for students.

The book contains 150 illustrations and 96 color photographs. Data includes 240 tables and forms. Included are specifications for rootzones, employment, calculations for

chemical applications, and extensive metric-imperial conversion. Business

and technical aspects of turfgrass management are covered in this 424-page Planning, purchasing, hiring, construction, and plant selection are put together for easy on-the-job reference.

Markets covered include lawn care, sod production, golf course management, cemeteries, athletic fields, and low maintenance areas. If it concerns turf, it's in the Turf Managers' Handbook.

A Step Ahead. **FYLKING.**

When this low-growing, Swedish lawn beauty first stepped into the turf world it revolutionized the lawn industry.

Now another step! Fylking Kentucky bluegrass costs less than most other elite bluegrasses!

Fylking establishes fast, develops a greater density of rhizomes and root system. Fine-textured, velvety green, Fylking performs well when cut low (even low as one-half inch), and may need less mowing. Amazingly tough, Fylking Ken-

tucky bluegrass has improved disease resistance to leaf spot, stripe smut, stem rust and leaf rust, as rated in tests by many major universities and institutions. Physically pure, genetically true seed, Fylking contains no annual bluegrass (*Poa annua*), bent grass or short-awned foxtail.

Take a giant step ahead by using Fylking as the backbone bargain of your next lawn turf mix. Ask for the Swedish beauty, Fylking Kentucky bluegrass at your local wholesale seed or sod distributor.

FYLKING KENTUCKY BLUEGRASS

Introducing FOLIAN®... the easy-to-use liquid fertilizer that's safe and effective on any kind of turf.

FOLIAN is a complete fertilizer. Its special formulation of N-P-K, sulfur and iron gets nutrients directly into grass tissue. And FOLIAN will not cause tip burn when used as directed.

Convenient to use

FOLIAN is the only turf-builder you'll ever need. It saves you time because there's no mixing or agitation required before using FOLIAN. And FOLIAN can be applied in more concentrated form than most other liquids. As a result, you can service more lawns per truckload

with fewer wasted man-hours.

A clear solution of the highest quality, FOLIAN won't settle out in your tanks. It's compatible with most pesticides, too.

Greens lawns fast

Because of its patented formulation and foliar activity, FOLIAN greens up turf quickly — faster than dry fertilizers or suspensions. And at the recommended rates, FOLIAN supplies enough residual fertilizer in the soil to keep grass green and healthy for many weeks.

Good for your business

Your customers will love the results

FOLIAN gives. And you'll appreciate FOLIAN's convenience.

Best of all, FOLIAN makes your lawn care service more valuable. It means repeat business from satisfied customers and greater confidence in you.

Give FOLIAN a try and discover how it can mean more green for both of you.

To find out more about how to get started using FOLIAN, call toll-free 800-228-2178 Omaha, Neb., 800-446-1841/800-446-1845 Hopewell, Va. or write Allied Chemical Corporation, Dept. AG, Box 2120, Houston, TX 77001.
