

THE EAGLE IS COMING!

NEW PENNEAGLE

ALL-PURPOSE CREEPING BENTGRASS

**At Last! One Grass That is
Designed to Cover Your
Entire Course...Tees,
Fairways and Greens!**

Developed by
Dr. Joseph M. Duich
PENN STATE UNIVERSITY

**18 YEARS
OF RESEARCH**

**5 YEARS
OF TESTING**

Hole #6 on the 4th nine at Congressional Country Club, Bethesda, Maryland had tees and greens seeded to Penn-eagle in September of 1977. Penneagle green was opened for play in June of 1978.

When a new grass is developed with the extensive research and testing that has gone into Penneagle Creeping Bentgrass it has these selected attributes of a great golf course grass. We say it's great for the entire course from tee to green. Penneagle is one grass that makes course management easier through mowing schedules, watering schedules and fertilizing schedules.

PENNEAGLE:

1. Has a broad genetic base for greater climatic adaptability.
2. Is not overly aggressive, but competitive with *Poa annua*.
3. Has tight, more upright growth characteristics.
4. Is finer leaved than most creeping bents.
5. Has excellent putting and playing qualities.
6. Was bred for disease resistance.

Available this fall in limited quantities.
