

Finally, the turf-type
tall fescue you've
been waiting for...

Rebel

As much as 30% finer and 188% denser than Kentucky 31*

When compared with Kentucky 31 and other commercially available tall fescue varieties, REBEL is finer and denser. REBEL provides a turf that is heat and drought tolerant yet withstands traffic and low maintenance.

Over four years of rigorous testing against other commercially available tall fescues proved REBEL to be as much as 30% finer with 188% more tillers than Kentucky 31.

Its overall performance makes REBEL the practical choice for a wide variety of turf uses: athletic fields, parks, home lawns and industrial landscaping areas. Widely adapted throughout the U.S., REBEL performs exceptionally well in transition zones (Philadelphia south to Atlanta, west to St. Louis and Kansas City, and Southern California).

Let REBEL perform for you!

Performance of commercially available tall fescue varieties in turf trials at North Brunswick and Adelphia, New Jersey respectively.

*Table 1	1975 to 1978	No. of Tillers per	Leaf Width (mm)
Variety	Avg.	sq. ft.	January 1980
Rebel	6.1	2271	2.4
Kenhy	3.1	724	3.5
Kenwell	3.0	806	3.4
Kentucky 31	2.6	789	3.4

Table 2	1979	No. of Tillers	Leaf Width (mm)
Variety	Average	per sq.ft. 11/79	November 1979
Rebel	6.4	1801	2.7
Kentucky 31	4.3	1319	3.2
Kenwell	4.1	945	3.6
Kenhy	3.8	1013	3.5
Kenmont	3.8	1086	3.6
Alta	2.9	902	3.8
Fawn	2.6	1102	3.7
Goar	1.7	1062	3.5

Turf Performance Score: 1—9; 9= Best
Tests mowed at 3/4" and maintained at moderately high fertility.
