

# All premium ryegrasses aren't alike. Here's the Regal difference

While a select few turf-type perennial ryegrasses are rated as "premium" varieties, Regal is a standout on several counts.

For example, Regal is one of the darkest of all ryegrasses. That's why it is often mixed with the improved bluegrasses and fine fescues to produce a rich, uniform turf.

Most turf experts agree that Regal has better heat and humidity tolerance than any other turf-type perennial ryegrass. It was the best in this regard in trials at Beltsville, Maryland and Arkansas.

Regal also demonstrates good overall disease-resistance to the major ryegrass diseases as well as the numerous diseases which often plague some bluegrass varieties.

To top it off, Regal germinates in a matter of 5-7 days, quickly develops a strong root system and holds its color during the chill days of winter.

**Regal — it's the turf-type perennial ryegrass that's different.**
