Flail Mowers can cut your TURF CARE COSTS

Mott Flail Mowers reflect extra value through greater versatility,
added production with longer trouble-free life, and safer operation.

No other mowing system is as versatile as the flail. With only one mower
investment, you can trim fine lawns, shred tough weeds, mulch, renovate,
dethatch and scalp. You can work any area that is smooth or rough, clean
or trashy, level or steeply banked, dry or "liquid wet". And you can operate
with much greater safety than with rotary mowers.

Mott Flail Mowers are built to last and can be used with most tractors.
Models are available in widths from 38 to 88 inches. In combination, they
will handle up to 19 foot swaths.

Contact us today and discover how the extra value of Mott Flails can
pay off by cutting your turf care costs.

MOW LAWNS ■ RENOVATE ■ MULCH LEAVES ■ SHRED WEEDS

Mott Interstater Cuts 19' Swath.

CASE STUDIES:

The compact trencher with a bagful of tricks: 25+4.

Most times the best player on the course is the one who makes all the shots. Long and short. Around trees. Through narrow openings. In all kinds of conditions.

That's just the kind of trencher the Case 25+4 is. A total player. With the compact D70 backhoe, a fully hydraulic backfill blade, and trenching capability to 66" (1676 mm) deep, the 25+4 can handle the toughest hole on your course. Whether it's for installation of sprinkler systems. Drainage work. Tree planting. Or just about anything.

At 23 hp (17 kW) it gives you a perfect balance of power and economy. It's articulated and has 4-wheel hydrostatic drive. So it'll probably never get trapped

someplace you don't want it. And it won't tear up the turf getting to and from jobs.

The 25+4 is easy to operate and service. New amateurs quickly learn how to use it. And old pros just love it.

The Case 25+4. The ideal trencher for golf course maintenance. The compact trencher with a whole bagful of tricks.

Circle No. 108 on Reader Inquiry Card

The Porta-Pusher I from Vermeer Manufacturing Co. is a portable tunneling unit which installs services up to 8.5 inches in diameter. The units

features a "hollow" cylinder design which places all the "push" directly on the rod without the need for external leverage devices. It is extremely fast and accurate, according to the manufacturing, and is designed especially for highways, streets and sidewalks.

Circle No. 172 on Reader Inquiry Card

The Medallion Grinder is a rotary hopper grinder that can be used to grind leaves, tree trimmings, orchard prunings, bark and scraps from sawmills. The end product may be used as fuel,

seed cover, mulch, compost and landfill. The unit is self-contained and mobile, featuring a diesel power unit and conveyor.

Circle No. 173 on Reader Inquiry Card

The Hahn Spreader is an oscillating-action unit which mounts directly for the frame of the Hahn Spray-Pro and is powered by its engine. The micro-

meter-type settings are adjustable from 12 to 45 ft.

Circle No. 174 on Reader Inquiry Card

Seymour Smith & Son's Snap-Cut reinforced fiberglass tree pruner poles are designed to provide added strength and durability at a cost comparable to

wooden poles. They feature a dielectric strength of 25,000 volts and DC current leakage does not exceed 90 microamperes when a 90 kilovolt charge is applied, according to the manufacturer.

You'll find one on every National . . .

The little decal that means big savings!

It does more than tell you the belt sizes used on National mowers. It signifies our commitment to build a mower that can be maintained easily and inexpensively. It tells you that these are standard, off-the-shelf items available from your local supplier, not a special, high-priced belt designed by a manufacturer to be available only from him. **It means less down time!**

But standard belts are only part of National's value. There's the normal maintenance factor which is reduced by National's obviously easy accessibility. Field reports tell us that **National mowers are one-third to one-half the cost** of maintaining competitive models.

Then there's greater fuel economy. National's simple, functional design means as much as 44% to 62% less fuel consumption than competitive, power-robbing, hydrostatic type rotary machines.

Best of all, **National's initial cost is less** than that of other mowers sold to do the same job.

In these days when purchase price, fuel economy, continuous performance and longevity are most important, look to a National to do more work, with easier

Model 84" Triplex

and faster maintenance, over a longer period.

Write to us for the name of your nearest dealer. Then call for a demonstration.

Model 68" Triplex

There's more to make you forget about down time

We still cut our own gears, forward, reverse and differential, out of solid steel blanks. These durable gears, carburized, hardened and tempered, are heavier than those used in many automobiles today.

Bed knives have upturned lips for extra wear and longer service. It prevents scalping and will not allow small objects to enter and damage reels.

BIG JOB OR SMALL...

BUNTON CUTS IT ALL.

1. TRACTORS: For the big jobs. Your choice of gasoline or diesel engines and a variety of attachments let Bunton tractors do much more than just cut grass.

2. PUSH MOWERS: For the small jobs. All Bunton push mowers are equipped with the best engines that the manufacturer builds. Even then, they have the reputation for outlasting several engines.

3. EDGER-TRIMMER: Versatile, describes Bunton edger-trimmers. The adjustable 10-inch model edges curbs as easily as walk-ways. An athletic field line cutter attachment is available.

4. SELF-PROPELLED: Real workhorses! Many options allow Bunton self-propelled mowers to be practically custom-built to meet specific mowing needs. Available in 24, 28, 32, 36 and 52 inch cuts.

Bunton builds 76 different mowers, many with optional engines, attachments and features.

Contract numbers:
G.S.A.: GS-07S-06286
H.U.D.: OPH (CO)m-3217

Bunton builds 'em better.
